

Group10-PA1 Potential Solutions: FIFA and Chess.com

Executive summary

The solution set keeps FIFA focused on task-first navigation, continuity across FIFA+, clearer ticket status, and utility entry points. It keeps Chess.com focused on novice onboarding, simpler analysis, expectation-setting around access limits, safer promotes, and clearer Focus Mode discovery.

Relationship to ProductResearch findings

Every FIFA drawback is owned by Le Minh and Nguyen Vu Bach; every Chess.com drawback is owned by Pham Nguyen Gia Bao and Trang Minh Nhut. Each drawback maps to its ProductResearch finding and evidence figure, affected use case, and exactly two solution IDs in the tables below.

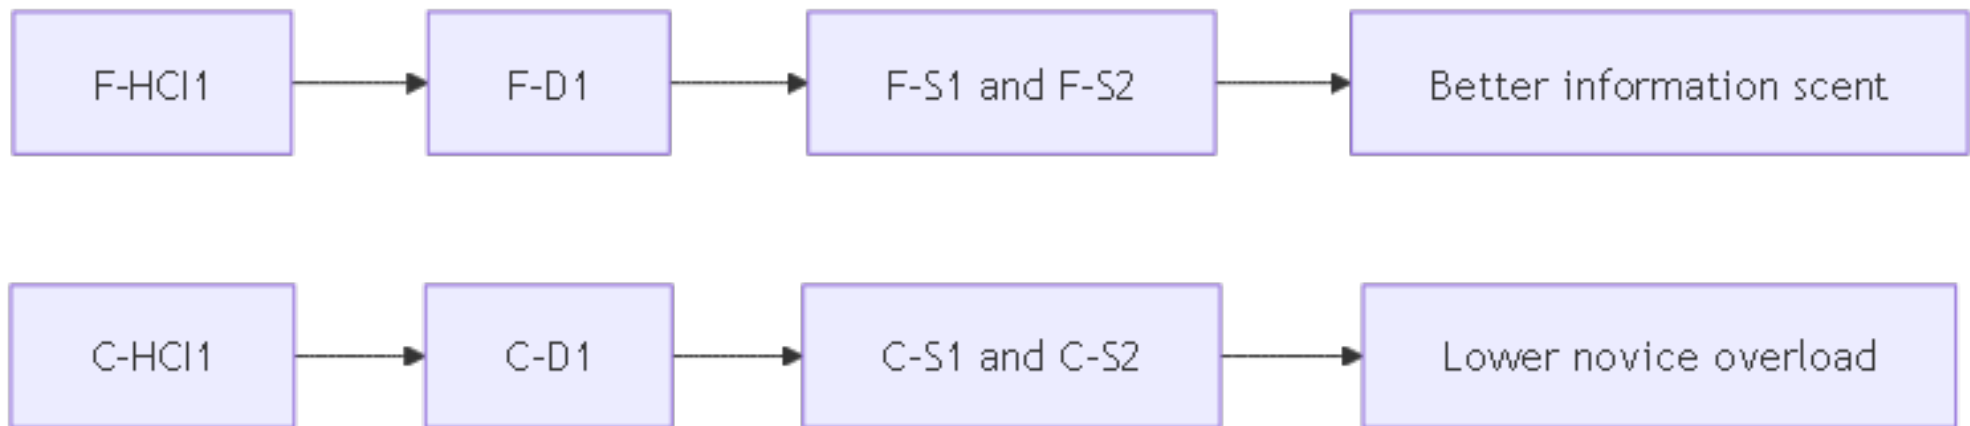

Diagram PS-D1. ProductResearch-to-solution traceability. This rendered diagram shows how an observed finding becomes a drawback, two proposed solutions, and an expected HCI improvement.

Drawback inventory

ID	Product	Drawback	Linked finding	Severity
F-D1	FIFA	Ecosystem sprawl across sibling FIFA properties	F-HCI6	High
F-D2	FIFA	FIFA+ handoff breaks continuity	F-HCI7	High
F-D3	FIFA	FIFA+ scan overload	F-HCI8	Medium
F-D4	FIFA	Ticket status uncertainty	F-HCI9	High
F-D5	FIFA	Browse-first friction for quick utilitarian tasks	F-HCI10	Medium
C-D1	Chess.com	Menu and feature overload for novices	C-HCI7	High
C-D2	Chess.com	Analysis overload	C-HCI10	High
C-D3	Chess.com	Premium gating interrupts learning momentum	C-HCI10	Medium
C-D4	Chess.com	Promote blunder risk	C-HCI8	High
C-D5	Chess.com	Focus Mode is hard to discover	C-HCI9	Medium

Drawback evidence and visual solution mapping

Drawback ID	Observed evidence	Problem	Persona	Context	HCI principle	Solutions	Solution description	Proposed solution figure	Expected improvement	Tradeoff	Priority	Effort
F-D1	F-09B + [1][6][9]	Cross-property navigation and top-level task competition span FIFA.com, Inside FIFA, FIFA+, Store, Collect, and Rewards.	F-P1/F-P3	Short task entry and trust-sensitive planning	context switching; mental-model consistency	F-S1/F-S2	Task-first navigation and audience intent chips	S-01	Fewer property jumps and clearer task entry	Commercial links receive less top-level exposure	High	Medium
F-D2	Source-only [6]	The DAZN-branded FIFA+ handoff changes brand and account expectations, creating trust friction and mode-boundary confusion.	F-P3	Family watch handoff after ticket or news research	continuity; orientation; visibility of system status	F-S3/F-S4	Handoff explainer and shared visual bridge	S-04	Clearer destination expectations and return path	Adds a step and needs cross-property coordination	High	Medium
F-D3	F-10B + [6]	Dense FIFA+ watch rails increase the scan load for live, highlight, documentary, competition, and archive content.	F-P3	Evening highlight search with family waiting	visual attention; choice overload; progressive disclosure	F-S5/F-S6	Rail filters and compact scan mode	No faithful existing mockup	Faster media discovery with less vertical scanning	Depends on reliable content metadata	Medium	Medium
F-D4	Source-only [5][9]	Sale, resale, waiting-room, and availability uncertainty force repeated manual checks.	F-P3	Multi-day family travel and ticket planning	visibility of system status; prospective memory	F-S7/F-S8	Ticket status dashboard and official availability alerts	No faithful existing mockup	Users know whether to act now or wait	Requires governed status data and notification consent	High	Medium
F-D5	F-06 + [1][2][3][7]	Article-to-score, article-to-ticket, and article-to-watch tasks require extra navigation after reading.	F-P1/F-P2/F-P3	Interrupted story reading followed by a utility task	task continuity; efficiency; information scent	F-S9/F-S10	Article utility rail and embedded action chips	S-03	Fewer article-to-task jumps	Utility controls may distract from reading	Medium	Low
C-D1	C-06 + [10][18][19][20]	The broad menu and feature taxonomy overload novices before they know which path fits their goal.	C-P1	First visit and beginner study	choice overload; progressive disclosure	C-S1/C-S2	Goal-based onboarding and personal dashboard	S-05	A clearer first success path	Adds onboarding and personalization state	High	Medium

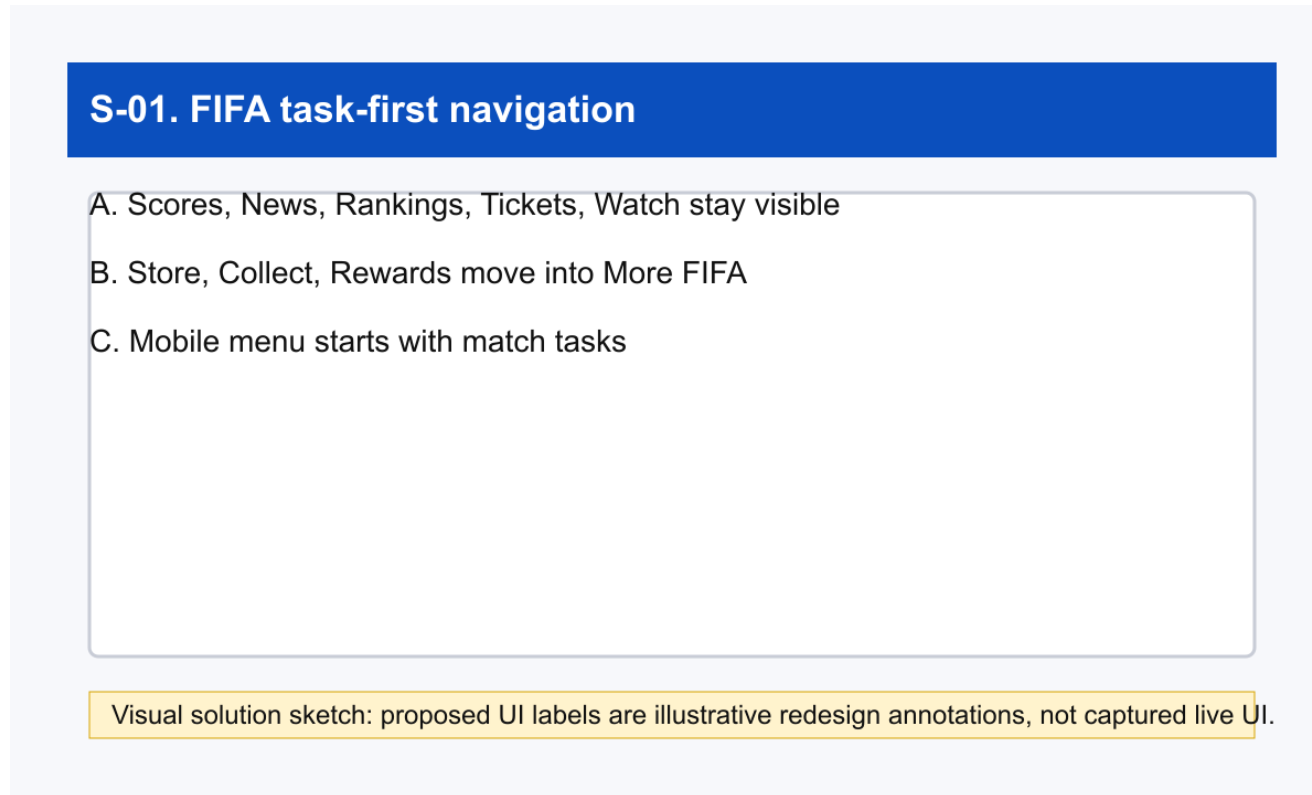

Drawback ID	Observed evidence	Problem	Persona	Context	HCI principle	Solutions	Solution description	Proposed solution figure	Expected improvement	Tradeoff	Priority	Effort
C-D2	Source-only [15][16][17]	Game Review and Analysis expose dense charts, lines, classifications, toggles, and labels before novices know what matters.	C-P1/C-P3	Post-loss review on laptop or desktop	cognitive load; external cognition	C-S3/C-S4	Beginner analysis preset and inline glossary	S-07	Readable feedback before expert controls	Advanced controls move one level deeper	High	Low
C-D3	Source-only [19]	Lesson, puzzle, and review limits can appear after attention is invested and interrupt learning momentum.	C-P1/C-P3	Beginner learning path after a loss	expectation setting; continuity; visibility of access state	C-S5/C-S6	Upfront entitlement labels and a soft landing	S-08	Fewer surprise access interruptions	Access labels add visual noise	Medium	Low
C-D4	Source-only [12]	A legal queued premove may execute after an unexpected reply and create a blunder.	C-P2	Blitz or bullet under clock pressure	speed-accuracy tradeoff; error prevention; recoverability	C-S7/C-S8	Premove queue preview and fast clear shortcut	S-06	More visible and recoverable queued intent	Risk estimates may be imperfect	High	Medium
C-D5	Source-only [13][14]	Focus Mode is hard to discover because related controls appear on hover near the board boundary.	C-P2/C-P3	Serious-game setup on desktop	discoverability; hidden controls; contextual help	C-S9/C-S10	Contextual coachmark and persistent settings shortcut	No faithful existing mockup	Focus Mode becomes findable without hover discovery	Coachmarks can annoy experts	Medium	Low

Drawback-to-solution mapping

Drawback	Solutions
F-D1	F-S1, F-S2
F-D2	F-S3, F-S4
F-D3	F-S5, F-S6
F-D4	F-S7, F-S8
F-D5	F-S9, F-S10
C-D1	C-S1, C-S2
C-D2	C-S3, C-S4
C-D3	C-S5, C-S6
C-D4	C-S7, C-S8
C-D5	C-S9, C-S10

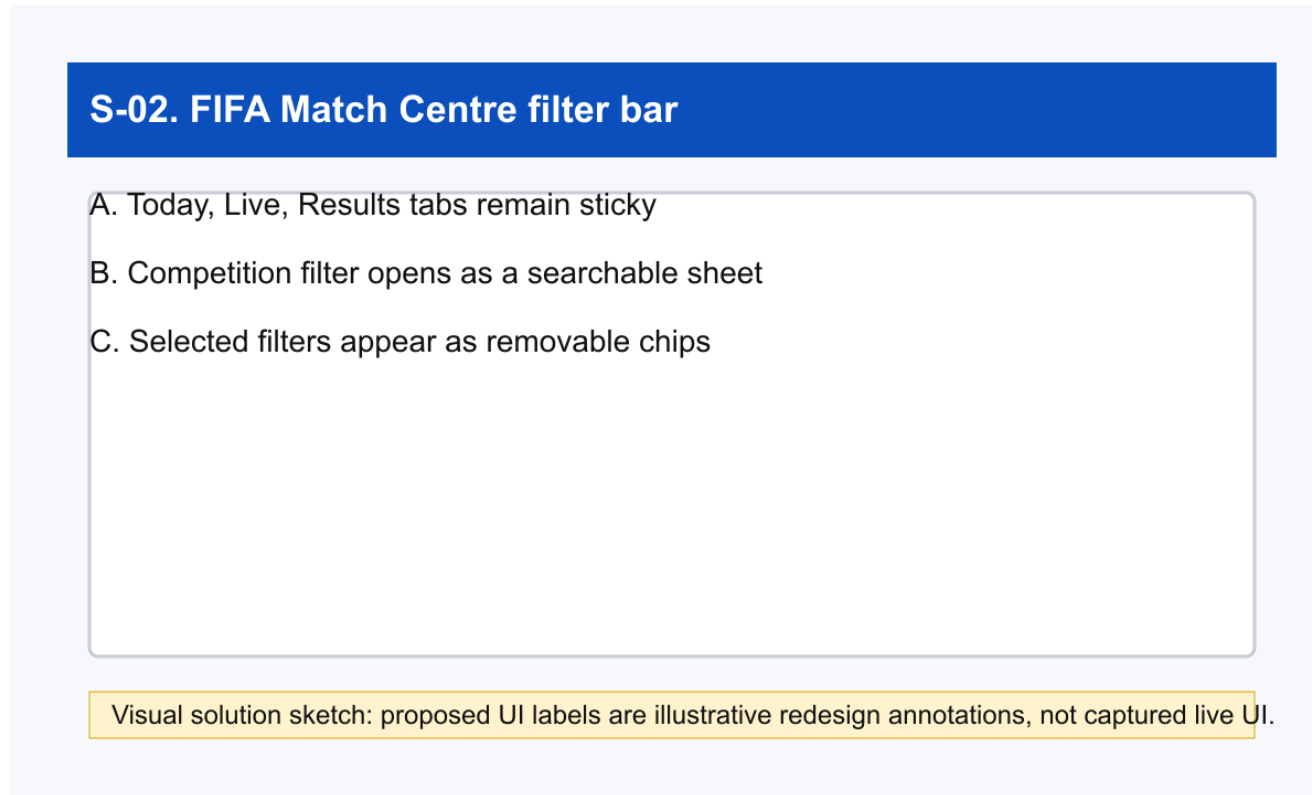

Visual solution figures

Figure S-01. FIFA task-first navigation

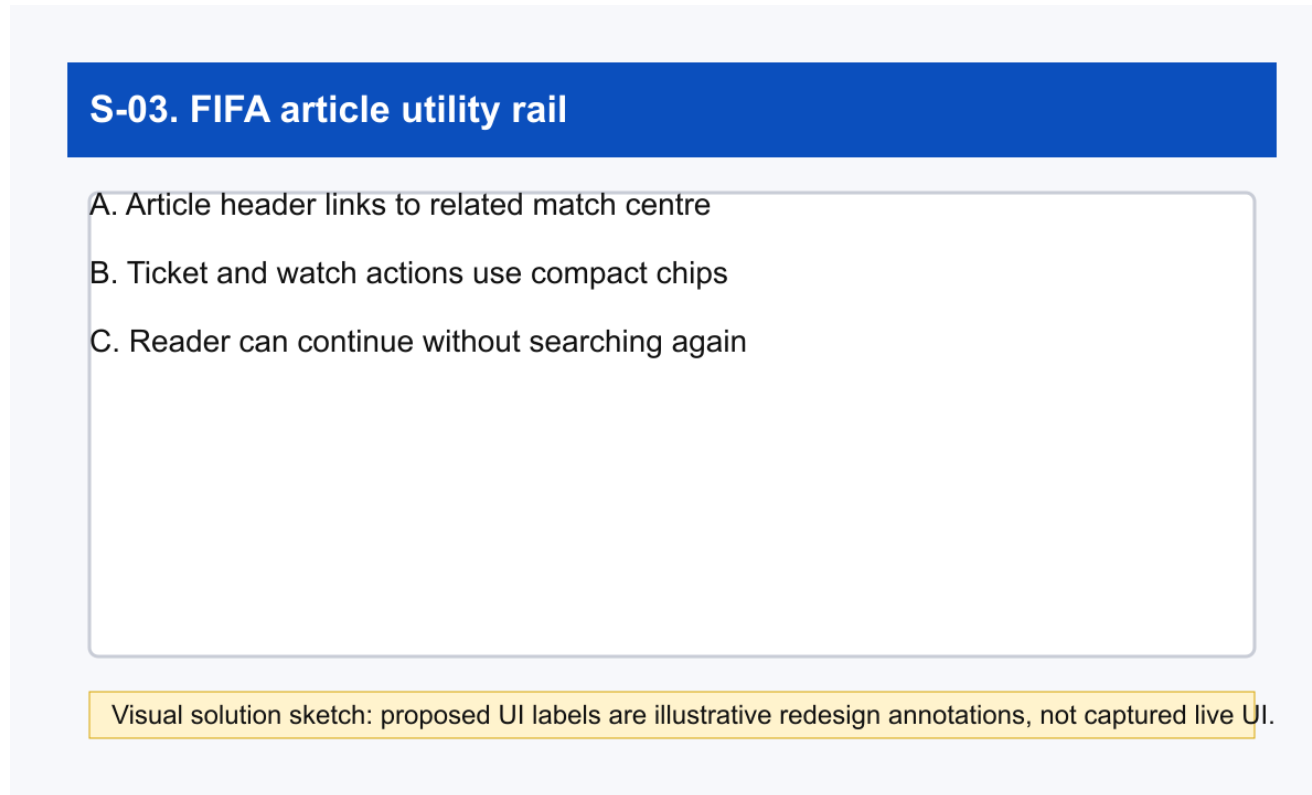

A task-first header reduces hidden navigation cost for casual fans and tournament followers.

Figure S-02. FIFA Match Centre filter bar

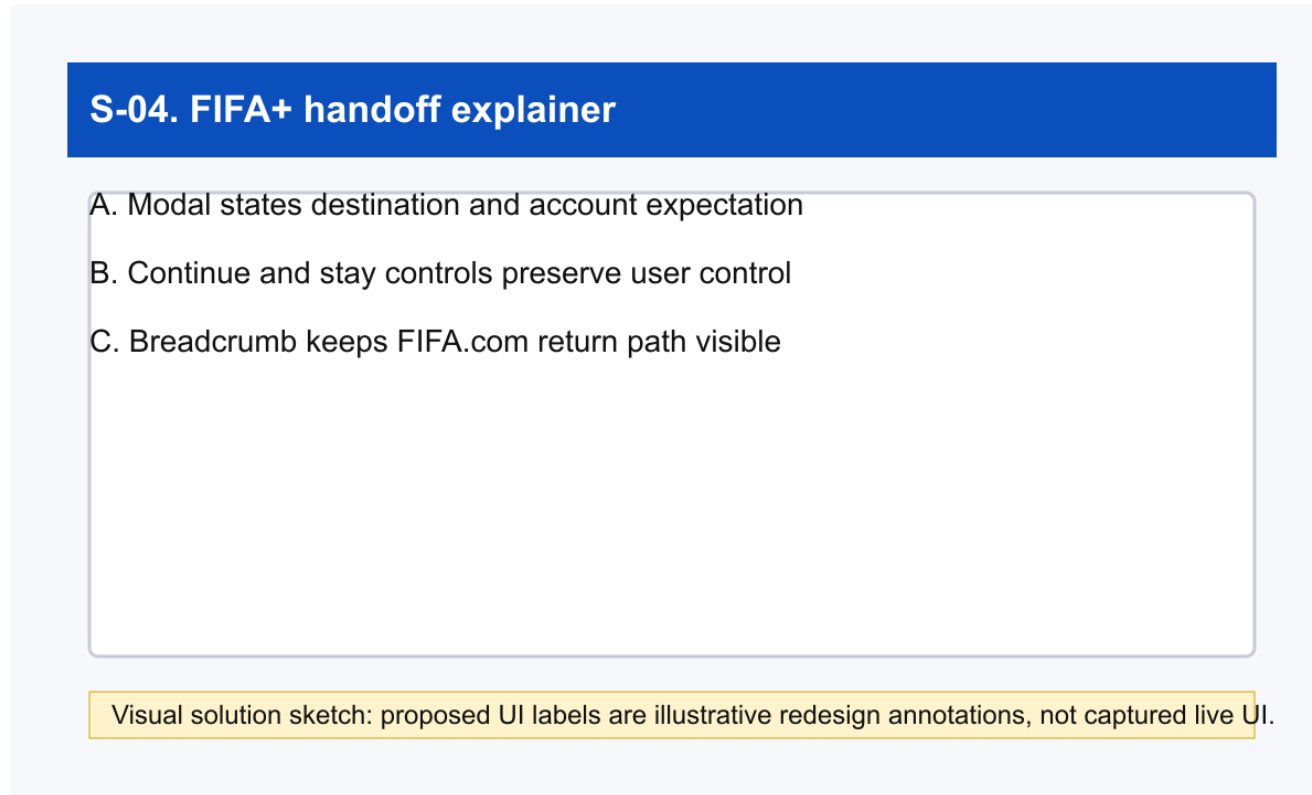

Sticky date, live, result, and competition controls reduce scanning in the Match Centre.

Figure S-03. FIFA article utility rail

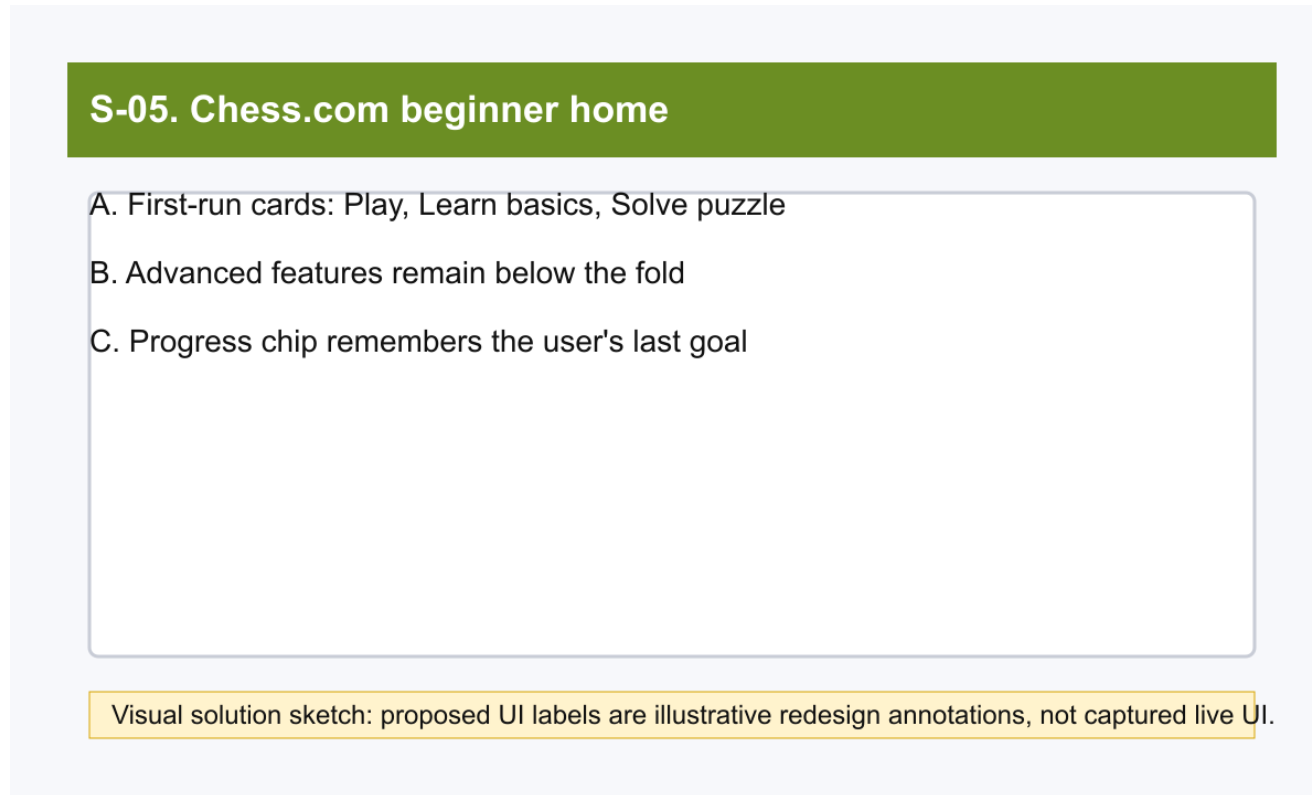

Context chips let an article reader jump to scores, tickets, or watch actions without re-searching.

Figure S-04. FIFA+ handoff explainer

A handoff explainer improves trust and user control before switching context to FIFA+.

Figure S-05. Chess.com beginner home

Goal-based cards reduce beginner feature overload before the user learns product taxonomy.

Figure S-06. Chess.com mobile board guard

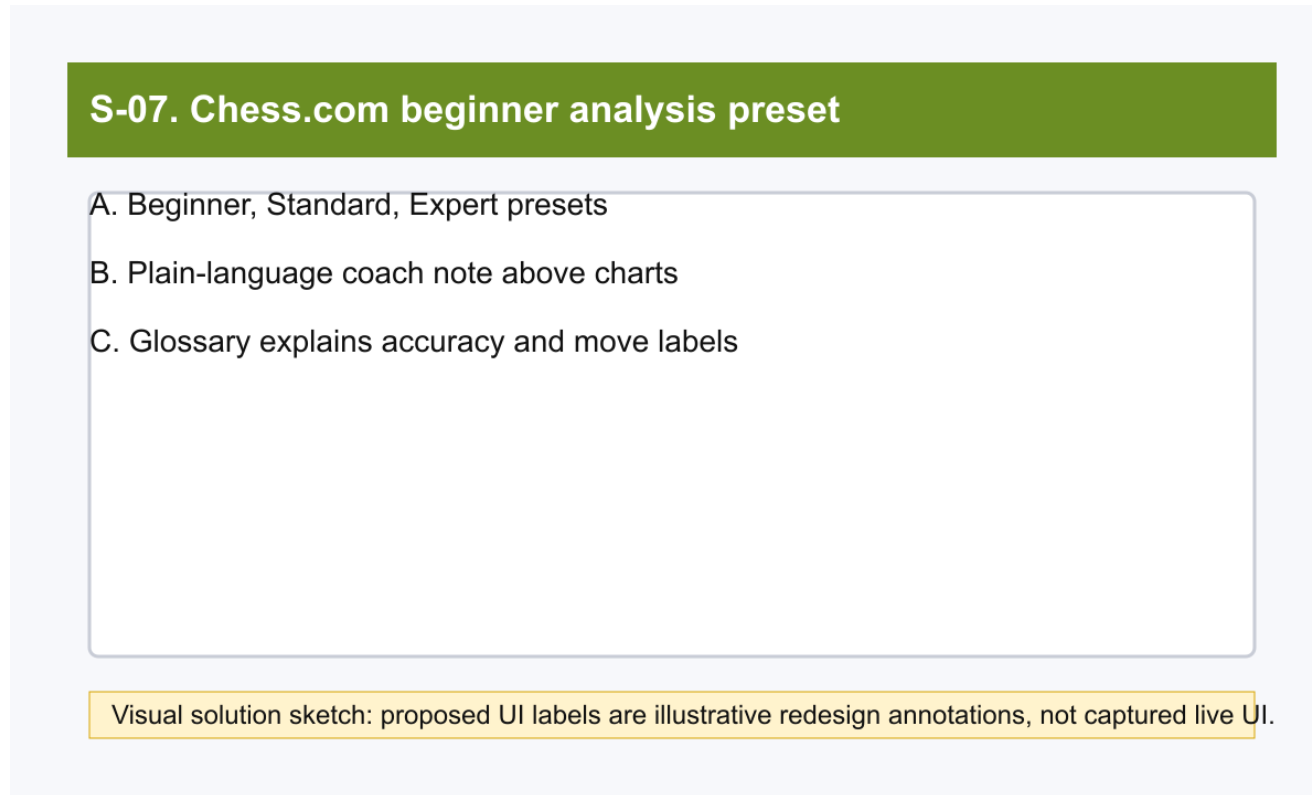

S-06. Chess.com mobile board guard

- A. Larger move controls and confirmation option
- B. Clock remains visible without covering board
- C. Clear premove action appears near status area

Visual solution sketch: proposed UI labels are illustrative redesign annotations, not captured live UI.

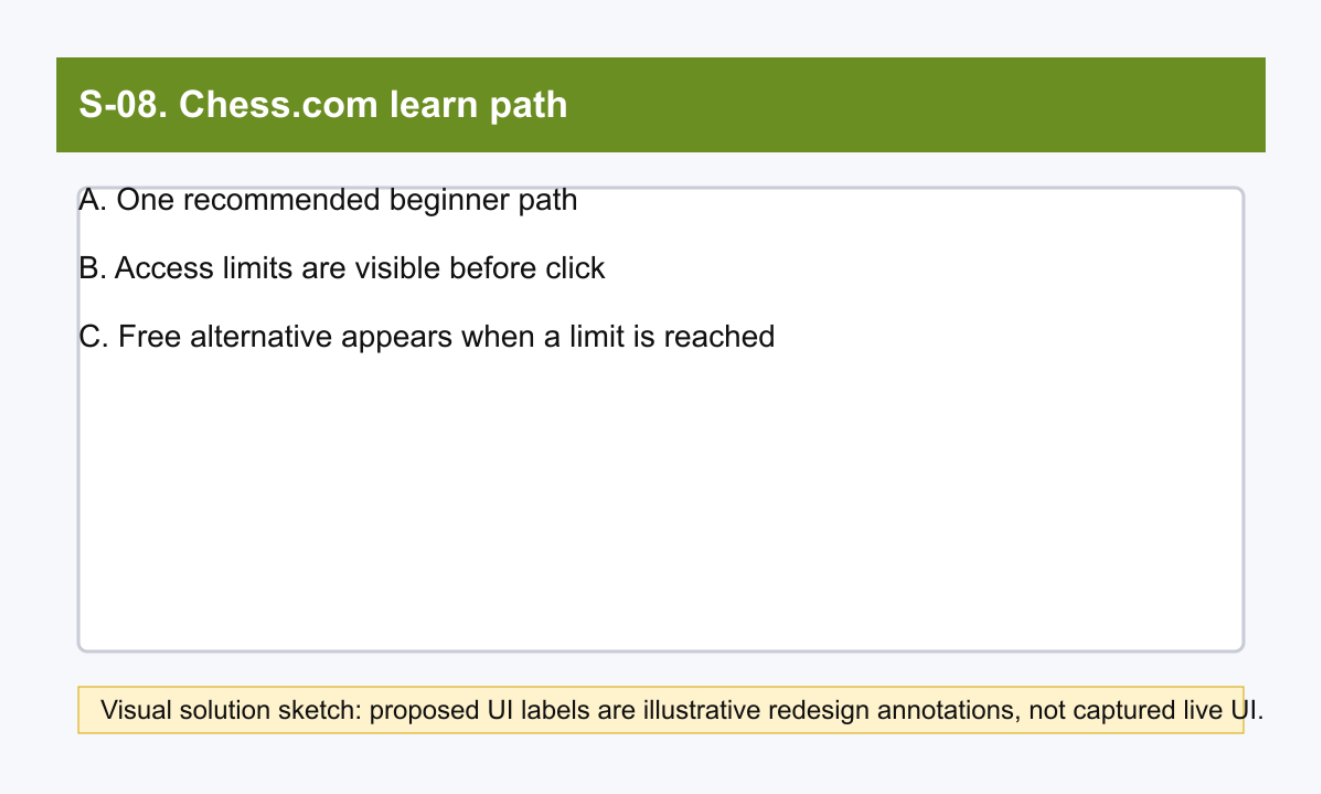

Larger controls and a clear premove action reduce mobile mis-tap risk under time pressure.

Figure S-07. Chess.com beginner analysis preset

Beginner, standard, and expert presets progressively reveal game-review complexity.

Figure S-08. Chess.com learn path

A recommended beginner path and visible access labels reduce learning-path uncertainty.

Solution details

ID	Drawback	Design concept	Detailed UI behavior	Mockup description in words	HCI principle mapping	Affected personas	Affected contexts	Expected effect	Tradeoff	Priority	Effort
F-S1	F-D1	Task-first global nav	Keep Match Centre, News, Rankings, Tickets, Watch at top level; move Store, Collect, and Rewards into More FIFA.	Slim header with one primary task row and one tucked ecosystem menu.	Recognition over recall; cognitive load reduction	F-P1/F-P2/F-P3	Short task entry, office browsing, ticket planning	Fewer property jumps for common tasks.	Store and collectibles receive less top-level exposure.	High	Medium
F-S2	F-D1	Audience intent switcher	Add five quick-intent chips under the hero: Scores, News, Rankings, Tickets, Watch.	Horizontal chip bar under page title.	Feedforward; efficient entry	F-P1/F-P2/F-P3	Short sessions with unclear starting point	Users choose by intent before reading navigation labels.	One more row competes for above-fold attention.	High	Low

ID	Drawback	Design concept	Detailed UI behavior	Mockup description in words	HCI principle mapping	Affected personas	Affected contexts	Expected effect	Tradeoff	Priority	Effort
F-S3	F-D2	Handoff explainer card	Before leaving FIFA.com, show You are opening FIFA+ powered by DAZN with destination benefits and sign-in expectation.	Centered modal with Continue and Stay on FIFA.com.	Visibility of system status; trust	F-P3	Family watch handoff	Users understand why branding and login state change.	Adds one step for repeat viewers.	High	Low
F-S4	F-D2	Shared breadcrumb and visual bridge	Add persistent Back to FIFA.com strip and tournament breadcrumb on FIFA+.	Thin top bar with FIFA icon, destination label, and return link.	Continuity; orientation	F-P3	FIFA+ watch browsing after ticket/news research	Users retain orientation across the watch boundary.	Needs cross-property coordination.	Medium	Medium
F-S5	F-D3	Filter-first rail controls	Provide filters for Live, Highlights, Documentaries, Competition, and Duration above rails.	Sticky filter row above content rails.	Visual filtering; reduced scan cost	F-P3	Evening highlight search	Users narrow a large content surface faster.	Filter accuracy depends on metadata quality.	High	Medium
F-S6	F-D3	Compact scan mode	Collapse nonmatching rails into section labels until expanded.	Condensed page with one expanded rail and folded sections.	Progressive disclosure; visual economy	F-P3	Slow browsing with family waiting	Lower vertical scanning burden.	Some content feels less discoverable.	Medium	Medium
F-S7	F-D4	Ticket status dashboard	Show Official sale, Resale open, Waiting room, Coming soon, and Latest update time by tournament.	Small status cards above ticket links.	Visibility of system status; planning support	F-P3	Trust-sensitive ticket planning	Users know whether to act now or wait.	Requires reliable status data and governance.	High	Medium
F-S8	F-D4	Official availability alerts	Offer email and browser alerts by tournament and market, confirmed by receipt.	Alert drawer with checkbox list and next release note.	Memory load reduction; trust	F-P3	Family travel planning over many days	Users stop manually rechecking availability.	Notification fatigue and opt-in compliance.	Medium	Medium
F-S9	F-D5	Utility rail on story pages	Add right rail or sticky side sheet for Scores today, Rankings latest, Tickets official source, Watch now.	Compact side module with four task cards.	Task continuity; reduced jumping	F-P1/F-P2/F-P3	Reading story then switching task	Story readers can branch into utilitarian tasks in context.	May distract from article reading.	Medium	Low
F-S10	F-D5	Embedded action chips in articles	Add context chips in article header: Open Match Centre, View Tickets, Watch on FIFA+.	Chip row under headline metadata.	Contextual navigation; information scent	F-P1/F-P2/F-P3	Tournament article with adjacent action need	Users can act from the article without searching navigation again.	Requires article metadata rules.	Medium	Low
C-S1	C-D1	Goal-based onboarding home	First-run chooser: Play now, Review last game, Learn basics, Solve puzzles, Join tournament.	Large task cards above default homepage feed.	Progressive disclosure; recognition over recall	C-P1/C-P2/C-P3	First visit after signup	New users see goals before feature taxonomy.	Adds onboarding state management.	High	Medium
C-S2	C-D1	Personal dashboard mode	User pins top three tasks and hides unused modules for 30 days.	Compact home with pinned cards and Edit layout button.	Personalization; cognitive load reduction	C-P1/C-P2/C-P3	Repeated use with stable goals	Homepage better matches user intent.	May hide growth paths if poorly explained.	Medium	Medium

ID	Drawback	Design concept	Detailed UI behavior	Mockup description in words	HCI principle mapping	Affected personas	Affected contexts	Expected effect	Tradeoff	Priority	Effort
C-S3	C-D2	Beginner analysis preset	One-click preset keeps evaluation bar, best move, and plain-language coach notes.	Preset chips at top of analysis panel: Beginner, Standard, Expert.	Progressive disclosure; low-friction defaults	C-P1	Post-loss beginner review	Novices get a readable analysis surface.	Advanced controls become one step deeper.	High	Low
C-S4	C-D2	Inline analysis glossary	Hover or tap chart and toggle labels for plain-language explanations.	Right-side info drawer with What this means text.	Learnability; reduced memory load	C-P1/C-P3	Analysis and Game Review study sessions	Users learn the meaning of graphs and labels in place.	Adds copy maintenance and localization work.	Medium	Medium
C-S5	C-D3	Upfront entitlement labels	Mark each lesson, puzzle, and analysis feature with access labels before click.	Small pill tags: Free, 3/day, 1 lesson/day, Diamond.	Expectation setting; error prevention	C-P1/C-P3	Learning path selection	Users know limits before investing attention.	Access labels may add visual noise.	High	Low
C-S6	C-D3	Soft-landing after limit reached	After a limit wall, offer free alternative, reset timer, and queue for later.	Modal with Continue learning free, Save for later, Upgrade.	Continuity; frustration reduction	C-P1	Study session after a daily limit	Users keep learning instead of stopping abruptly.	May reduce upgrade pressure.	Medium	Medium
C-S7	C-D4	Premove queue preview	Show pending premoves with danger icon when opponent reply tree makes risk high.	Tiny queue strip above board, first item tinted warning color.	Error prevention; system status	C-P2	Blitz and bullet time trouble	Users see what will execute before it happens.	Risk estimate can be imperfect.	High	Medium
C-S8	C-D4	Fast clear shortcut	One-click Clear or Esc clears queued premove chain.	Small Clear premoves pill next to clocks or settings.	Recoverability; user control	C-P2	Fast play after unexpected opponent move	Users recover from risky queued intent quickly.	Adds one more in-game control.	Medium	Low
C-S9	C-D5	First-time coachmark	After two full games, show Need fewer distractions? Try Focus Mode.	Tooltip near board corner.	Discoverability; contextual help	C-P2	Post-game moment before next serious game	Users learn the hidden control when it is relevant.	Coachmarks can annoy expert users.	Medium	Low
C-S10	C-D5	Persistent settings shortcut	Add Focus Mode toggle into board settings and keyboard shortcut help.	Settings panel item with live preview thumbnail.	Consistency; discoverability	C-P2/C-P3	Board settings and serious-game setup	Focus Mode becomes findable without hover discovery.	Settings panel grows slightly.	Medium	Low

Prioritized impact-effort matrix

Solution	Concept	Priority	Effort	Rollout bucket
F-S1	Task-first global nav	High	Medium	Deeper redesign
F-S2	Audience intent switcher	High	Low	Quick win
F-S3	Handoff explainer card	High	Low	Quick win
F-S4	Shared breadcrumb and visual bridge	Medium	Medium	Deeper redesign
F-S5	Filter-first rail controls	High	Medium	Deeper redesign
F-S6	Compact scan mode	Medium	Medium	Deeper redesign
F-S7	Ticket status dashboard	High	Medium	Deeper redesign
F-S8	Official availability alerts	Medium	Medium	Deeper redesign
F-S9	Utility rail on story pages	Medium	Low	Quick win
F-S10	Embedded action chips in articles	Medium	Low	Quick win
C-S1	Goal-based onboarding home	High	Medium	Deeper redesign

Solution	Concept	Priority	Effort	Rollout bucket
C-S2	Personal dashboard mode	Medium	Medium	Deeper redesign
C-S3	Beginner analysis preset	High	Low	Quick win
C-S4	Inline analysis glossary	Medium	Medium	Deeper redesign
C-S5	Upfront entitlement labels	High	Low	Quick win
C-S6	Soft-landing after limit reached	Medium	Medium	Deeper redesign
C-S7	Premove queue preview	High	Medium	Deeper redesign
C-S8	Fast clear shortcut	Medium	Low	Quick win
C-S9	First-time coachmark	Medium	Low	Quick win
C-S10	Persistent settings shortcut	Medium	Low	Quick win

Quick wins

ID	Concept	Why first
F-S2	Audience intent switcher	High priority with Low effort; concrete UI can be tested without changing core architecture.
F-S3	Handoff explainer card	High priority with Low effort; concrete UI can be tested without changing core architecture.
F-S9	Utility rail on story pages	Medium priority with Low effort; concrete UI can be tested without changing core architecture.
F-S10	Embedded action chips in articles	Medium priority with Low effort; concrete UI can be tested without changing core architecture.
C-S3	Beginner analysis preset	High priority with Low effort; concrete UI can be tested without changing core architecture.
C-S5	Upfront entitlement labels	High priority with Low effort; concrete UI can be tested without changing core architecture.
C-S8	Fast clear shortcut	Medium priority with Low effort; concrete UI can be tested without changing core architecture.
C-S9	First-time coachmark	Medium priority with Low effort; concrete UI can be tested without changing core architecture.
C-S10	Persistent settings shortcut	Medium priority with Low effort; concrete UI can be tested without changing core architecture.

Deeper redesigns

ID	Concept	Why deeper
F-S1	Task-first global nav	Requires cross-page, data, personalization, or cross-property coordination.
F-S4	Shared breadcrumb and visual bridge	Requires cross-page, data, personalization, or cross-property coordination.
F-S5	Filter-first rail controls	Requires cross-page, data, personalization, or cross-property coordination.
F-S6	Compact scan mode	Requires cross-page, data, personalization, or cross-property coordination.
F-S7	Ticket status dashboard	Requires cross-page, data, personalization, or cross-property coordination.
F-S8	Official availability alerts	Requires cross-page, data, personalization, or cross-property coordination.
C-S1	Goal-based onboarding home	Requires cross-page, data, personalization, or cross-property coordination.
C-S2	Personal dashboard mode	Requires cross-page, data, personalization, or cross-property coordination.
C-S4	Inline analysis glossary	Requires cross-page, data, personalization, or cross-property coordination.

ID	Concept	Why deeper
C-S6	Soft-landing after limit reached	Requires cross-page, data, personalization, or cross-property coordination.
C-S7	Premove queue preview	Requires cross-page, data, personalization, or cross-property coordination.

Rollout plan

Sprint 1 implements quick wins, tests wording and UI placement, and validates with the personas most affected by each drawback. Sprint 2 handles task-first navigation, ticket status, FIFA+ filters, personalized Chess.com home, glossary behavior, and premove queue preview. QA checks that every drawback from ProductResearch still maps to exactly two solutions.
