

GroupID-PA1 Potential Solutions: Strava and Nike Run Club

Executive summary

This report maps every Strava and Nike Run Club drawback from ProductResearch to two concrete interface solutions. Strava work prioritizes recoverability, privacy clarity, route simplification, healthier social comparison, and post-activity readability. Nike Run Club work prioritizes missed audio recovery, beginner plan selection, healthy motivation, live-sharing privacy, and safer during-run metrics.

Problem inventory

ID	Product	Problem	Severity
S-D1	Strava	Irrecoverable discard risk	High
S-D2	Strava	Privacy audience uncertainty	High
S-D3	Strava	Route planning overload	Medium
S-D4	Strava	Leaderboard pressure	Medium
S-D5	Strava	Post-activity detail density	Medium
N-D1	Nike Run Club	Audio-guided run cues may be missed in noisy outdoor contexts.	Medium
N-D2	Nike Run Club	Training plan selection may overload beginners.	Medium
N-D3	Nike Run Club	Challenge and achievement mechanics may pressure casual users.	Medium
N-D4	Nike Run Club	Live location sharing may create privacy uncertainty.	High
N-D5	Nike Run Club	During-run metric density may distract runners in motion.	Medium

Solution framework

Each design concept states affected product, personas, contexts, UI behavior, HCI principle mapping, expected improvement, tradeoffs, priority, and effort.

ID	Product	Drawback	Design concept	UI and behavior detail	HCI principles	Affected personas	Affected contexts	Expected improvement
S-S1	Strava	S-D1	Recoverable Activity Trash	After discard, move activity to a 7-day trash with Restore and Delete forever.	Error prevention	All users	Post-run	Recoverability
S-S2	Strava	S-D1	Safer Finish Hierarchy	Make Save primary, move Discard behind a confirm sheet with activity summary.	Feedback	All users	Post-run	Recoverability
S-S3	Strava	S-D2	Privacy Receipt	Show audience, map visibility, and home-area warning before save.	Transparency	All users	Post-run	Privacy clarity
S-S4	Strava	S-D2	Sensitive Route Reminder	Detect route near saved home area and suggest Only You or hidden map zone.	Feedback	All users	Post-run	Privacy clarity
S-S5	Strava	S-D3	Simple Route Wizard	Ask distance, sport, and loop/out-back, then recommend one editable route.	Progressive disclosure	All users	Post-run	Route simplification
S-S6	Strava	S-D3	Route Confidence Labels	Label routes Easy, Hilly, Unfamiliar, or Busy based on visible criteria.	Feedforward	All users	Post-run	Route simplification
S-S7	Strava	S-D4	Peer-Band Leaderboards	Default casual users to similar-level comparison bands before global ranking.	Motivation	All users	Post-run	Healthier social comparison
S-S8	Strava	S-D4	Personal Progress First	Show PR delta and trend before rank for casual profiles.	Feedback	All users	Post-run	Healthier social comparison
S-S9	Strava	S-D5	Post-Activity Summary Mode	Show map, distance, time, privacy first; hide comments/segments behind tabs.	Cognition	All users	Post-run	Post-activity readability
S-S10	Strava	S-D5	Large-Type Review	Offer high-contrast, large-type post-run summary for tired or low-light contexts.	Vision	All users	Post-run	Post-activity readability
N-S1	Nike Run Club	N-D1	Audio Cue Replay button	Small accessible control on run screen and headphone gesture shortcut; shows last	Feedback	All users	During-run	Missed audio recovery
N-S2	Nike Run Club	N-D1	Adaptive cue mode	User selects Quiet route, Normal, or Noisy street; app increases cue clarity, haptic em	Feedback	All users	During-run	Missed audio recovery
N-S3	Nike Run Club	N-D2	Beginner Plan Wizard	Ask current ability, target distance, available days, injury concern; recommend one	Feedback	All users	During-run	Beginner plan selection
N-S4	Nike Run Club	N-D2	Plan difficulty receipt	Before starting a plan, show weekly load, rest days, expected longest run, and Ed	Feedback	All users	During-run	Beginner plan selection
N-S5	Nike Run Club	N-D3	Healthy Streak mode	Rest day counts as protected training when user selects recovery.	Motivation	All users	During-run	Healthy motivation
N-S6	Nike Run Club	N-D3	Challenge pressure filter	Label challenges Casual, Consistent, Competitive; default new users to Casual.	Feedback	All users	During-run	Healthy motivation
N-S7	Nike Run Club	N-D4	Live Sharing Receipt	After starting sharing, show recipients, duration, stop button, and finish notificat	Feedback	All users	During-run	Live-sharing privacy
N-S8	Nike Run Club	N-D4	Auto-stop and expiry control	Default live sharing expires at run end or chosen duration; end screen confi	Feedback	All users	During-run	Live-sharing privacy
N-S9	Nike Run Club	N-D5	Focus Run screen	During movement, show only distance, pace, and elapsed time with large type; move other	Feedback	All users	During-run	During-run metrics
N-S10	Nike Run Club	N-D5	Crossing-safe interaction lock	If phone detects fast movement and screen wake, delay nonessential overla	Feedback	All users	During-run	During-run metrics

Drawback-to-solution mapping

Drawback	Solutions

N-D5	N-S9, N-S10

Detailed implementation notes

S-S1 Recoverable Activity Trash

Affected product: Strava. Drawback: S-D1. Affected personas: Maya/Lina. Affected contexts: End-of-run fatigue.

UI and behavior level: After discard, move activity to a 7-day trash with Restore and Delete forever. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Error recovery; user control. Expected gain: fewer lost recordings. Tradeoff: storage and extra state. Priority High. Effort Medium.

S-S2 Safer Finish Hierarchy

Affected product: Strava. Drawback: S-D1. Affected personas: Maya/Lina. Affected contexts: Sweaty hands after activity.

UI and behavior level: Make Save primary, move Discard behind a confirm sheet with activity summary. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Error prevention; motor efficiency. Expected gain: fewer accidental destructive actions. Tradeoff: one extra tap for true discard. Priority High. Effort Low.

S-S3 Privacy Receipt

Affected product: Strava. Drawback: S-D2. Affected personas: Maya/Lina. Affected contexts: Home route sharing.

UI and behavior level: Show audience, map visibility, and home-area warning before save. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Privacy mental model; visibility. Expected gain: higher confidence. Tradeoff: more review text. Priority High. Effort Low.

S-S4 Sensitive Route Reminder

Affected product: Strava. Drawback: S-D2. Affected personas: Maya. Affected contexts: Campus/home start.

UI and behavior level: Detect route near saved home area and suggest Only You or hidden map zone. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Error prevention; feedforward. Expected gain: lower accidental exposure. Tradeoff: false positives. Priority High. Effort Medium.

S-S5 Simple Route Wizard

Affected product: Strava. Drawback: S-D3. Affected personas: Dara/Maya. Affected contexts: Planning a new route.

UI and behavior level: Ask distance, sport, and loop/out-back, then recommend one editable route. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Progressive disclosure; recognition. Expected gain: lower setup effort. Tradeoff: less initial control. Priority Medium. Effort Medium.

S-S6 Route Confidence Labels

Affected product: Strava. Drawback: S-D3. Affected personas: Dara/Maya. Affected contexts: Map route choice.

UI and behavior level: Label routes Easy, Hilly, Unfamiliar, or Busy based on visible criteria. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation

path.

HCI principle mapping: Feedforward; mental model. Expected gain: faster decision. Tradeoff: requires clear criteria. Priority Medium. Effort Medium.

S-S7 Peer-Band Leaderboards

Affected product: Strava. Drawback: S-D4. Affected personas: Maya/Dara. Affected contexts: Segment review.

UI and behavior level: Default casual users to similar-level comparison bands before global ranking. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Motivation design; satisfaction. Expected gain: less demotivation. Tradeoff: competitive users may prefer global view. Priority Medium. Effort High.

S-S8 Personal Progress First

Affected product: Strava. Drawback: S-D4. Affected personas: Maya. Affected contexts: Post-run review.

UI and behavior level: Show PR delta and trend before rank for casual profiles. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Feedback; user fit. Expected gain: healthier motivation. Tradeoff: rank is one tap deeper. Priority Medium. Effort Low.

S-S9 Post-Activity Summary Mode

Affected product: Strava. Drawback: S-D5. Affected personas: Lina. Affected contexts: Low-light review.

UI and behavior level: Show map, distance, time, privacy first; hide comments/segments behind tabs. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Cognitive load reduction. Expected gain: less visual overload. Tradeoff: advanced metrics are less immediate. Priority Medium. Effort Medium.

S-S10 Large-Type Review

Affected product: Strava. Drawback: S-D5. Affected personas: Lina. Affected contexts: Evening walk.

UI and behavior level: Offer high-contrast, large-type post-run summary for tired or low-light contexts. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Vision; accessibility. Expected gain: better readability. Tradeoff: more display modes. Priority Low. Effort Medium.

N-S1 Audio Cue Replay button

Affected product: Nike Run Club. Drawback: N-D1. Affected personas: Anh/Sofia/Minh. Affected contexts: Noisy streets, fatigue, music playback.

UI and behavior level: Small accessible control on run screen and headphone gesture shortcut; shows last cue text summary for 5 seconds. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Recovery; auditory limitation support; reduced memory load. Expected gain: fewer missed instructions. Tradeoff: adds control to run screen. Priority High. Effort Low.

N-S2 Adaptive cue mode

Affected product: Nike Run Club. Drawback: N-D1. Affected personas: Anh/Sofia/Minh. Affected contexts: Traffic or crowded route.

UI and behavior level: User selects Quiet route, Normal, or Noisy street; app increases cue clarity, haptic emphasis, and text summary by mode. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Context-aware feedback; multimodal interaction. Expected gain: better guidance in traffic. Tradeoff: mode setup can add complexity. Priority Medium. Effort High.

N-S3 Beginner Plan Wizard

Affected product: Nike Run Club. Drawback: N-D2. Affected personas: Anh/Minh. Affected contexts: First 5K or return after break.

UI and behavior level: Ask current ability, target distance, available days, injury concern; recommend one plan with a clear reason. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Recognition over recall; progressive disclosure. Expected gain: lower setup effort. Tradeoff: users may want full list immediately. Priority High. Effort Medium.

N-S4 Plan difficulty receipt

Affected product: Nike Run Club. Drawback: N-D2. Affected personas: Anh/Minh. Affected contexts: Low-confidence plan selection.

UI and behavior level: Before starting a plan, show weekly load, rest days, expected longest run, and Edit Difficulty. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Feedforward; user control; error prevention. Expected gain: lower overcommitment. Tradeoff: more pre-plan reading. Priority Medium. Effort Medium.

N-S5 Healthy Streak mode

Affected product: Nike Run Club. Drawback: N-D3. Affected personas: Anh/Minh. Affected contexts: Rest-day anxiety.

UI and behavior level: Rest day counts as protected training when user selects recovery. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Motivation design; overtraining prevention. Expected gain: less pressure to run every day. Tradeoff: streak semantics change. Priority Medium. Effort Medium.

N-S6 Challenge pressure filter

Affected product: Nike Run Club. Drawback: N-D3. Affected personas: Anh/Minh. Affected contexts: Monthly challenge browsing.

UI and behavior level: Label challenges Casual, Consistent, Competitive; default new users to Casual. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Mental model alignment; choice architecture. Expected gain: better fit by user type. Tradeoff: challenge taxonomy maintenance. Priority Medium. Effort Low.

N-S7 Live Sharing Receipt

Affected product: Nike Run Club. Drawback: N-D4. Affected personas: Sofia/Minh. Affected contexts: Night run family sharing.

UI and behavior level: After starting sharing, show recipients, duration, stop button, and finish notification status. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Visibility of system status; privacy mental model. Expected gain: higher trust. Tradeoff: extra status surface. Priority High. Effort Low.

N-S8 Auto-stop and expiry control

Affected product: Nike Run Club. Drawback: N-D4. Affected personas: Sofia/Minh. Affected contexts: Safety sharing with family.

UI and behavior level: Default live sharing expires at run end or chosen duration; end screen confirms sharing stopped. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Error prevention; closure feedback. Expected gain: lower privacy risk. Tradeoff: edge cases for extended runs. Priority Medium. Effort Medium.

N-S9 Focus Run screen

Affected product: Nike Run Club. Drawback: N-D5. Affected personas: Sofia/Anh. Affected contexts: Bright sunlight and fast pace.

UI and behavior level: During movement, show only distance, pace, and elapsed time with large type; move other metrics behind swipe or post-run detail. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Cognitive load reduction; human vision; motor efficiency. Expected gain: safer glance behavior. Tradeoff: fewer metrics visible by default. Priority High. Effort Medium.

N-S10 Crossing-safe interaction lock

Affected product: Nike Run Club. Drawback: N-D5. Affected personas: Sofia/Anh. Affected contexts: Road crossings.

UI and behavior level: If phone detects fast movement and screen wake, delay nonessential overlays and use voice or haptic cues. Mockup description in words: the control appears in the same task surface where the problem occurs, uses one short label, shows the current state, and provides a visible recovery or confirmation path.

HCI principle mapping: Interruption management; safety; attention support. Expected gain: fewer distraction moments. Tradeoff: may suppress desired messages. Priority Medium. Effort High.

Impact-effort prioritization

Priority band	Solutions	Reason
---	---	---
Quick wins	N-S1 Audio Cue Replay; N-S3 Beginner Plan Wizard; N-S7 Live Sharing Receipt; N-S9 Focus Run screen; S-S2 Safer Finish Hierar	
Deeper redesign	N-S2 Adaptive cue mode; N-S4 Plan difficulty receipt; N-S5 Healthy Streak mode; N-S8 Auto-stop and expiry control; N-S1	
Later enhancements	S-S5 Simple Route Wizard; S-S6 Route Confidence Labels; S-S8 Personal Progress First; S-S9 Post-Activity Summary Mod	

Phased recommendation plan

Phase 1 implements quick wins for Nike Run Club and Strava. Phase 2 tests deeper redesigns with beginner and night-run scenarios. Phase 3 revisits social motivation defaults after peer review. The design team should prototype N-S1, N-S3, N-S7, and N-S9 first because they are visible in the exact moments where the HCI risk occurs.
