

GroupID-PA1 Product Research: FIFA and Chess.com web experiences

Group ID: GroupID. Members: Le Minh, 21127645, Nguyen Vu Bach, 21127224, Pham Nguyen Gia Bao, 20127119, Trang Minh Nhut, 22127318. Course: HCI. Date: 2026-06-10. Product pair: FIFA.com and Chess.com. Screenshot evidence note: all screen-level claims reference captured or annotated Playwright evidence.

Executive summary

This report compares FIFA and Chess.com as web experiences with opposite interaction centers. FIFA is primarily browse, compare, and follow: the user moves through official football news, match data, rankings, tickets, and a FIFA+ watch handoff. Chess.com is primarily do, review, and improve: the user starts games, manages speed features, reviews finished games, analyzes positions, solves puzzles, follows lessons, and plans tournaments. Numbered references are used for all product claims.

Method and evidence protocol

The team observed official website screens through Chromium automation, saved raw screenshots, generated annotated versions and crops with sharp, and recorded captions in assets/figures_manifest.json. Screenshots are used as evidence only when the referenced UI region is visible. Limitations: login-only personalized states were not entered, and any live content visible on access date may change.

Team ownership and evidence responsibility

FIFA.com evidence and analysis are co-owned by Le Minh and Nguyen Vu Bach. Chess.com evidence and analysis are co-owned by Pham Nguyen Gia Bao and Trang Minh Nhut.

Scope	Primary contributor	Reviewer
F-UC1, F-UC2, F-HCI1 to F-HCI5	Nguyen Vu Bach	Le Minh
F-UC3, F-UC4, F-UC5, F-HCI6 to F-HCI10	Le Minh	Nguyen Vu Bach
C-UC1, C-UC2, C-HCI1 to C-HCI5	Pham Nguyen Gia Bao	Trang Minh Nhut
C-UC3, C-UC4, C-UC5, C-HCI6 to C-HCI10	Trang Minh Nhut	Pham Nguyen Gia Bao

Figure	Product	Evidence role
F-01 to F-08	FIFA.com	Captured live pages for home, navigation, Match Centre, search, article, competition, and mobile density
F-09B, F-10B, F-08A	FIFA.com	Observed footer, media destination, and mobile detail evidence
C-01 to C-08	Chess.com	Captured live pages for home, play, board, puzzle, learn, navigation, feedback, and mobile layout
C-06M, C-04A	Chess.com	Observed mobile navigation and puzzle detail evidence
S-01, S-02, S-05, S-07	Proposed designs	Clearly labeled solution sketches; never treated as observed UI

Product selection rationale

Product	Domain	Modality	Positioning
FIFA	fifa.com (with inside.fifa.com and plus.fifa.com sibling properties)	Browse-first web product for football information, rankings, ticketing, and watch handoff	Browse-first football web ecosystem for official news, match-following, rankings, tournament discovery, ticketing trust, and FIFA+ watch handoff.
Chess.com	chess.com	Action-first web product for play, review, analysis, and learning	Action-first chess web platform for games, review, self-analysis, puzzles, lessons, study plans, tournaments, and fair-play-guided competitive play.

FIFA.com was selected as the official browse-first football portal. Chess.com was selected as an action-first online chess platform. The comparison isolates how sports websites differ when one product centers on official information discovery and the other centers on immediate gameplay and feedback.

Source method

Official English pages were prioritized. FIFA client-side pages that yielded sparse crawl text were retained as official URLs when screenshots confirmed the screen. Chess.com claims rely on the official homepage, observed Playwright screenshots, and official support pages. Secondary sources were not needed.

Citation	Product	Type	Claim supported
[1]	FIFA	Official FIFA news and navigation	Inside FIFA exposes Latest FIFA News and the global navigation labels Match Centre, News, Rankings, Tickets & Hospitality, Play, Inside FIFA, plus sibling destinations such as FIFA+, Store, Collect, and Rewards.
[2]	FIFA	Official FIFA topic index	The all stories page supports exploratory browsing through categories, content types, articles, blogs, media releases, videos, and albums.
[3]	FIFA	Official FIFA tournament blog	The FIFA World Cup 2026 blog functions as a tournament story hub with dated updates and story cards.
[4]	FIFA	Official FIFA media release	FIFA directs fans to FIFA.com/tickets to register interest, create a FIFA ID, and follow phased ticket releases.
[5]	FIFA	Official FIFA media release	FIFA.com/tickets is identified as the official and preferred ticket source; fans are asked to check it regularly; the official Resale/Exchange Marketplace is available for eligible ticket holders.
[6]	FIFA	Official FIFA+ watch destination	FIFA+ presents a watch surface with sign-in or get-started controls, live or upcoming content, highlights, replays, documentaries, and archive content. The FIFA+ destination is presented through a DAZN-branded page.
[7]	FIFA	Official FIFA Match Centre	The Match Centre URL exposes fixtures, results, match details, competitions, and live-now filtering; some content is client-side rendered.
[8]	FIFA	Official FIFA rankings page	The rankings page exposes the latest men's ranking table, filters, official update dates, and ranking rules notes.
[9]	FIFA	Official FIFA tickets page	The tickets URL is the official entry point for first-hand FIFA tournament ticket and hospitality information; the page is client-side rendered in crawled text.
[10]	Chess.com	Official Chess.com homepage	The homepage foregrounds Play, Puzzles, Learn, Train, Watch, Community, Get Started, lessons, bots, puzzles, and watching events.
[11]	Chess.com	Official Chess.com help	Users can start games from the homescreen or site-wide Play menu, using recent time control, custom settings, random opponent, bots, or friends.
[12]	Chess.com	Official Chess.com help	Premoves can be enabled and then entered while it is the opponent's turn; the feature saves time but executes automatically if legal.
[13]	Chess.com	Official Chess.com help	Focus Mode minimizes distractions by expanding the board and showing only the board, clocks, draw, and resign controls.
[14]	Chess.com	Official Chess.com help	Board settings, Focus Mode, Theatre Mode, and Flip Board appear when hovering near the board/sidebar boundary, creating a discoverability issue for hidden controls.
[15]	Chess.com	Official Chess.com help	Game Review appears after a game and provides a detailed review flow with accuracy, move classifications, key moves, coach guidance, graphs, and retry learning.

Citation	Product	Type	Claim supported
[16]	Chess.com	Official Chess.com help	Game Analysis lets users revisit analyzed games and continue deeper study through analysis tools.
[17]	Chess.com	Official Chess.com help	The Analysis Board supports direct manipulation, setup position, FEN/PGN loading, game history, collections, engine settings, evaluation bar, lines, arrows, and move feedback.
[18]	Chess.com	Official Chess.com help	Puzzles are reachable from the side menu or homepage and include puzzle of the day, rated puzzles, themes, Puzzle Rush, and Puzzle Battle.
[19]	Chess.com	Official Chess.com help	Lessons are reached from Learn, use interactive practice challenges, and include access limits by membership level.
[20]	Chess.com	Official Chess.com article	Study plans guide players by skill level and help organize training time through curated lessons and videos.
[21]	Chess.com	Official Chess.com help	Tournament schedules expose arena and prize tournament calendars such as Titled Tuesday, Arena Kings, Bullet Brawls, and variant events.
[22]	Chess.com	Official Chess.com fair-play page	The fair-play page explains competitive integrity, account closures, fair-play policy, event checks, and enforcement expectations.

Product A: FIFA.com

FIFA.com is the official football web portal for sports news, match information, tournament discovery, rankings, official media, tickets, and FIFA+ handoff when relevant.

FIFA user groups

Casual fans, tournament followers, and media/student researchers need official football information under different time pressure and credibility requirements.

Product B: Chess.com

Chess.com is an online chess platform for playing games, solving puzzles, learning lessons, reviewing games, reading chess content, and improving chess skill.

Chess.com user groups

Beginner learners, competitive online players, and returning casual players need fast play, visible feedback, and progressive learning paths.

Personas

ID	Persona	Age range	Tech experience	Domain experience	Main goal	Frustration	Device	Environment	Usage frequency	Constraint
F-P1	Casual football fan	18-25	Medium	Low-medium	Check today's fixtures, live scores, results, and short news quickly	Slow paths to match information	Mobile phone	Public transport or short break	Several times per week	Interrupted attention and low patience
F-P2	Tournament follower	24-40	High	Medium-high	Follow tournament pages, teams, fixtures, standings, and media	Too many tournament links to compare	Desktop	Home or office	Weekly during tournaments	Needs scannable date/team comparison

ID	Persona	Age range	Tech experience	Domain experience	Main goal	Frustration	Device	Environment	Usage frequency	Constraint
F-P3	Media or student researcher	20-35	High	Medium	Find official football news, tournament history, team info, and reliable sources	Unclear source path across FIFA properties	Laptop	Focused research session	Monthly or project-based	Needs credible source trails
C-P1	Beginner chess learner	13-22	Medium	Low	Start a simple game, learn rules, solve easy puzzles	Feature overload before knowing chess terms	Mobile or laptop	Home or school	Several times per week	Low domain knowledge and needs guidance
C-P2	Competitive online player	18-35	High	High	Start a rated game quickly and monitor clock, moves, rating, opponent status	Delay or mis-tap under time pressure	Desktop	Focused play setup	Daily	Motor accuracy and low delay tolerance
C-P3	Returning casual player	25-45	Medium-high	Medium	Play a daily or quick game, read content, review mistakes	Forgets feature locations and analysis meanings	Mobile browser	Interrupted home use	Weekly	Needs recognition and lightweight feedback

FIFA personas

ID	Name	Age	Tech proficiency	Goal	Context
F-P1	Lan Tran	20	Medium	Check scores, fixtures, and one key tournament story between classes	Student on campus laptop, short time window, noisy environment, intermittent attention
F-P2	Ethan Nguyen	27	High	Follow official tournament news and rankings during office breaks	Desktop at work, multiple tabs open, daylight glare, short sessions, high scan pressure
F-P3	Maria Pham	31	Medium	Verify official ticket source, resale status, and then watch highlights on FIFA+	Evening home browsing on laptop, compares tabs, trust-sensitive, family trip planning

Chess.com personas

ID	Name	Age	Tech proficiency	Goal	Context
C-P1	Minh Bui	18	Medium	Learn chess basics through lessons, puzzles, and a study plan	Student on shared laptop, beginner mental model, low confidence, needs guidance
C-P2	Alex Hoang	24	High	Start blitz games fast, use premoves, reduce distractions, keep momentum	External keyboard and mouse, noisy dorm room, many short sessions, time pressure
C-P3	Quynh Le	29	High	Review finished games, run self-analysis, and plan tournament play	Quiet desktop setup, longer study sessions, strong interest in accuracy and improvement

Use cases

ID	Title	Product	Persona	Device	Posture	Attention	Distraction	Normal flow	Alternate flow	Error path	Figures	HCI concepts
F-UC1	Find today's match schedule	FIFA.com	F-P1	Mobile	One-handed glance	Low	Public transport	Open FIFA.com, select Match Centre, scan date/live rows	No live match; switch to results	Slow client render; retry/refresh	F-04, F-08	information scent, visibility of status
F-UC2	Check live score or result	FIFA.com	F-P1	Mobile/desktop	Short break	Low	Noisy place	Use Match Centre and live toggle	Sort/filter by competition	Too many entries; search competition	F-04	mental model, cognitive load

ID	Title	Product	Persona	Device	Posture	Attention	Distraction	Normal flow	Alternate flow	Error path	Figures	HCI concepts
F-UC3	Read football news article	FIFA.com	F-P2	Desktop/mobile	Leaning back	Medium	Office	Open News or article URL, scan headline/body	Use related links	Reading interrupted by dense media	F-06	visual attention, reading load
F-UC4	Find tournament information	FIFA.com	F-P2	Desktop	Focused comparison	Medium	Home/office	Open tournament page, scan dates/teams/content	Use navigation/footer	Wrong FIFA property reached	F-07, F-09B	information architecture, consistency
F-UC5	Search team/player/article/tournament	FIFA.com	F-P3	Laptop	Focused lookup	High	Research session	Open search, enter query, compare result categories	Use navigation if search fails	Sparse or mixed results	F-05	recognition, error recovery
C-UC1	Start quick online chess game	Chess.com	C-P2	Desktop/mobile	Focused play	High	Quiet or noisy room	Open Play, choose time control, start game	Custom challenge or friend	Account prompt or match settings mismatch	C-02, C-07	efficiency, user control
C-UC2	Solve a puzzle	Chess.com	C-P1	Mobile/desktop	Learning posture	Medium	School/home	Open Puzzles, read prompt, make move, observe feedback	Choose puzzle mode	Intro modal or access limit interrupts	C-04, C-11	feedback, learnability
C-UC3	Learn a beginner lesson	Chess.com	C-P1	Laptop	Exploratory	Medium	Home	Open Learn/Lessons, choose beginner topic	Use study plan	Too many paths	C-05	progressive disclosure
C-UC4	Review game or view board feedback	Chess.com	C-P3	Desktop	Reflective study	High	Quiet desk	Finish/open game, view review/analysis controls	Use analysis board	Dense feedback overwhelms	Source-only [15][16][17]	informative feedback
C-UC5	Read chess news/opening content	Chess.com	C-P3	Mobile/desktop	Casual reading	Medium	Interrupted attention	Open News, scan article list, open story	Search community content	Navigation density distracts	C-09B, C-06	content discovery, memory load

F-UC1. Open Match Centre and check today's matches

Field	Detail
Primary persona	F-P1
Where:	Campus hallway or study area
When:	Between classes during a five-minute break
Posture:	Standing or leaning over a laptop/tablet while moving between tasks
Device:	Laptop browser
Attention level:	Intermittent and divided by hallway noise
Environment:	Noisy campus setting with short session length
Interaction method:	Mouse or trackpad navigation through FIFA global navigation and Match Centre filters
Goal:	Find current fixtures or results quickly
Trigger:	Short break begins
Precondition:	Browser online; FIFA.com reachable
Normal flow:	Open FIFA.com; choose Match Centre; scan today/live filters; open one match detail; return to list
Alternate flow:	If no live match appears, switch to latest results
Error path:	Client-side content is slow; use navigation label and retry or refresh
Feedback observed:	Fixture cards, live status, score rows, match detail link
Figure or source reference:	[1][7]

Field	Detail
HCI concepts:	Information scent; recognition over recall; visibility of system status
Success outcome:	User knows which matches are active today

F-UC2. Open official tournament news and read one FIFA World Cup 2026 story

Field	Detail
Primary persona	F-P2
Where:	Office desk
When:	Short work break after seeing a tournament headline
Posture:	Seated desktop browsing with multiple tabs open
Device:	Desktop browser
Attention level:	Medium; scanning under time pressure
Environment:	Office glare and interruptions
Interaction method:	Click navigation, story-card scanning, and topic filtering
Goal:	Read one current official tournament story
Trigger:	Office break and tournament headline interest
Precondition:	Inside FIFA and tournament blog available
Normal flow:	Open Inside FIFA; choose FIFA World Cup 2026 blog or News; scan dated story cards; open one story; return to topic hub
Alternate flow:	Use All stories filters if blog card is not visible
Error path:	Story list overload delays choice
Feedback observed:	Dated cards, topic labels, article headline, breadcrumb
Figure or source reference:	[1][2][3]
HCI concepts:	Information foraging; hierarchical scanning; cognitive load
Success outcome:	One article read and source confidence maintained

F-UC3. Open Rankings from the global navigation

Field	Detail
Primary persona	F-P2
Where:	Work desk or shared office space
When:	Immediately after a ranking question from another person
Posture:	Seated and task-focused
Device:	Desktop browser
Attention level:	High but brief
Environment:	Office context with multiple open tabs
Interaction method:	Global navigation, table scanning, and filter selection
Goal:	Check the latest official ranking quickly
Trigger:	Coworker asks ranking question
Precondition:	Ranking page reachable
Normal flow:	Open FIFA global nav; choose Rankings; select men's ranking; scan rank table; note last official update
Alternate flow:	Switch filters if the wrong table appears

Field	Detail
Error path:	Ranking table loads after shell; user waits or retries
Feedback observed:	Rank table, filters, update date, full rankings control
Figure or source reference:	[1][8]
HCI concepts:	Efficient task entry; data table scanability; feedback on loading state
Success outcome:	User identifies latest ranking and update date

F-UC4. Verify official tickets and resale source

Field	Detail
Primary persona	F-P3
Where:	Home planning setup
When:	Evening family trip planning session
Posture:	Seated laptop browsing while comparing sources
Device:	Laptop browser
Attention level:	High because the task is trust-sensitive
Environment:	Home environment with multiple comparison tabs
Interaction method:	Navigation to tickets, cross-checking media releases, and saving official URL
Goal:	Confirm official ticket and resale route before family purchase
Trigger:	Trip planning conversation begins
Precondition:	Ticket page and media release available
Normal flow:	Open FIFA Tickets; cross-check media release; identify FIFA.com/tickets; read resale/exchange note; save official URL
Alternate flow:	Check hospitality if standard tickets unavailable
Error path:	Availability changes require repeated checks
Feedback observed:	Official/preferred wording, ticket URL, resale/exchange marketplace cue
Figure or source reference:	[4][5][9]
HCI concepts:	Credibility; error prevention; visibility of official status
Success outcome:	User trusts FIFA.com/tickets and understands resale/exchange status

F-UC5. Open FIFA+ and start a watch session

Field	Detail
Primary persona	F-P3
Where:	Home viewing context
When:	After news or ticket research leads to video interest
Posture:	Seated laptop browsing with family nearby
Device:	Laptop browser
Attention level:	Medium; sensitive to account and brand changes
Environment:	Evening home browsing with shared decision-making
Interaction method:	Ecosystem navigation to FIFA+, rail scanning, and sign-in/get-started decision
Goal:	Move from FIFA information to FIFA+ highlights or archive
Trigger:	After ticket/news research, user wants video

Field	Detail
Precondition:	FIFA+ URL reachable; account may be required
Normal flow:	Choose FIFA+ from FIFA ecosystem; land on watch page; scan live/highlight rails; select content; sign in or get started
Alternate flow:	Continue browsing FIFA.com if sign-in is not acceptable
Error path:	DAZN branding creates handoff uncertainty
Feedback observed:	FIFA+ hero, sign-in/get-started controls, live and archive rails
Figure or source reference:	[1][6]
HCI concepts:	Continuity; feedforward; trust friction; choice overload
Success outcome:	User starts or understands the next step for watching

C-UC1. Start a live game with default or custom settings

Field	Detail
Primary persona	C-P2
Where:	Dorm room or personal desk
When:	Short blitz window
Posture:	Seated, ready for fast mouse input
Device:	Desktop browser with external mouse
Attention level:	High and time-sensitive
Environment:	Noisy dorm with repeated short sessions
Interaction method:	Clicking Play, selecting time control/opponent, and starting a match
Goal:	Begin a game with low setup time
Trigger:	User has a short blitz window
Precondition:	Signed in or guest play available
Normal flow:	Open Chess.com; choose Play or homescreen start; accept recent time control or customize; choose random opponent, bot, or friend; start
Alternate flow:	Choose unrated or custom settings first
Error path:	Rating or match settings mismatch; return to play setup
Feedback observed:	Play call-to-action, time control, rated toggle, opponent choice
Figure or source reference:	[10][11]
HCI concepts:	Efficiency; clear call to action; recognition over recall
Success outcome:	Game starts with selected opponent and time control

C-UC2. Use premoves during a blitz game

Field	Detail
Primary persona	C-P2
Where:	Live chess board screen
When:	During a blitz game when the clock is low
Posture:	Seated and physically tense under time pressure
Device:	Desktop browser with mouse
Attention level:	Very high but narrowed by time stress
Environment:	Noisy dorm or fast-play setting

Field	Detail
Interaction method:	Drag-and-drop or click-move input while opponent is moving
Goal:	Save seconds under time pressure without losing control
Trigger:	Clock drops below comfort level
Precondition:	Premoves enabled in live settings
Normal flow:	During opponent turn, drag next move; observe queued move; continue if response fits
Alternate flow:	Disable removes for serious accuracy
Error path:	Opponent reply makes queued idea risky but legal
Feedback observed:	Board input, queued move behavior, clock feedback
Figure or source reference:	[12]
HCI concepts:	Error prevention; direct manipulation; time pressure feedback
Success outcome:	Queued legal move executes after opponent response

C-UC3. Turn on Focus Mode before a serious game

Field	Detail
Primary persona	C-P2
Where:	Chess.com board page
When:	Before starting a serious game
Posture:	Seated and preparing for focused play
Device:	Desktop browser
Attention level:	High, with distraction sensitivity
Environment:	Dorm or shared space with surrounding noise
Interaction method:	Hovering near board/sidebar boundary and selecting Focus Mode
Goal:	Reduce visual distraction and expand the board
Trigger:	User starts a serious game
Precondition:	Board visible; focus control available
Normal flow:	Hover near board/sidebar boundary; choose Focus Mode; confirm board-only layout; start game
Alternate flow:	Use keyboard shortcut or settings if discovered
Error path:	Control hidden on hover and missed by first-time user
Feedback observed:	Focus icon, expanded board, clocks, draw and resign controls
Figure or source reference:	[13][14]
HCI concepts:	Discoverability; progressive disclosure; attention management
Success outcome:	Board expands and nonessential panels hide

C-UC4. Run Game Review after a finished game, then go to Self Analysis

Field	Detail
Primary persona	C-P3
Where:	Quiet desktop study setup
When:	Immediately after a completed game
Posture:	Seated for a longer review session

Field	Detail
Device:	Desktop browser
Attention level:	High and reflective
Environment:	Quiet room suited to analysis
Interaction method:	Clicking Game Review, graph/move inspection, retry action, and Analysis Board handoff
Goal:	Understand mistakes and continue engine study
Trigger:	Game ends
Precondition:	Finished game saved; review available
Normal flow:	Click Game Review; inspect graph, accuracy, key moves; retry a move; open Game Analysis or Analysis Board
Alternate flow:	Reopen review from archive
Error path:	Premium or depth gates interrupt expectations
Feedback observed:	Game Review button, graph, move classifications, retry, analysis controls
Figure or source reference:	[15][16][17]
HCI concepts:	Feedback; reflection; learning loop; cognitive load
Success outcome:	User sees classifications and starts deeper analysis

C-UC5. Solve puzzles and choose a follow-up lesson or study plan

Field	Detail
Primary persona	C-P1
Where:	Shared laptop or student study space
When:	After a loss or when planning improvement practice
Posture:	Seated beginner practice posture
Device:	Laptop browser
Attention level:	Medium; confidence may be low
Environment:	Shared study environment with limited time
Interaction method:	Puzzle interaction, feedback reading, Learn navigation, and study-plan selection
Goal:	Build beginner skill through a guided loop
Trigger:	Student wants to improve after a loss
Precondition:	Puzzles and Learn reachable
Normal flow:	Open Puzzles; solve puzzle of day or rated puzzle; review feedback; open lesson or study plan; save next step
Alternate flow:	Choose a beginner lesson first
Error path:	Premium limit appears after click and interrupts momentum
Feedback observed:	Puzzle feedback, Learn menu, study-plan link, access labels
Figure or source reference:	[18][19][20]
HCI concepts:	Guidance; progressive disclosure; formative feedback
Success outcome:	User completes a puzzle and chooses next learning action

Screen-level HCI analysis with annotated figures

Figure F-01. FIFA.com home page information hierarchy

The highlighted hero and task-entry regions show how a casual fan's attention is pulled between promotional content and football task entry.

Figure F-02. FIFA.com desktop navigation

The top navigation labels support recognition over recall for Match Centre, News, Rankings, Tickets, and More.

Figure F-03. FIFA.com mobile navigation

The mobile header and menu entry show the extra progressive-disclosure step before match-related tasks.

Figure F-04. FIFA.com Match Centre

The date rail, search, live toggle, and match rows support the user's mental model of checking fixtures by day.

Figure F-05. FIFA.com search and discovery

The search state supports official lookup tasks but needs clear category separation for teams, tournaments, and articles.

Figure F-06. FIFA.com news article page

FIFA World Cup 26™ Ticketing Programme launches this September

The banner features a blue background on the left with the FIFA World Cup 26 logo (a trophy inside a '26' with 'FIFA' below it). To the right is a circular image of a cheering couple. The text 'SEE YOU NEXT YEAR' is prominently displayed in large white letters. Below it, smaller text reads 'TICKET APPLICATION OPENS 10 SEPT.'. At the bottom left, there is a black button with 'REGISTER YOUR INTEREST' and a white button with 'FIFA.COM/TICKETS'. A red box labeled 'A' highlights the top-left corner of the banner, and another red box labeled 'B' highlights the couple in the circular image.

SEE YOU NEXT YEAR

TICKET APPLICATION OPENS 10 SEPT.

REGISTER YOUR INTEREST

FIFA.COM/TICKETS

English - Other languages (4)

The article surface shows reading-load and scan-load issues for football news consumption.

Figure F-07. FIFA.com tournament page

The tournament page groups competition discovery content for a tournament follower.

Figure F-08. FIFA.com mobile content density

The observed promotional modal on mobile is direct evidence of attention interruption over the home-page content.

Figure F-09B. FIFA.com footer and ecosystem navigation

The footer and ecosystem links show how global support and sibling destinations extend the navigation map.

Figure F-10B. FIFA+ video or media area

The captured media destination supplies observed context for the FIFA+ watch surface; source [6] remains authoritative for rails and DAZN handoff claims.

Figure F-08A. FIFA.com mobile interruption crop

The crop isolates the observed mobile overlay interruption.

Figure S-01. Proposed FIFA task-first navigation

This is a proposed solution sketch, not observed live UI.

Figure S-02. Proposed FIFA Match Centre filter bar

This is a proposed solution sketch, not observed live UI.

Figure C-01. Chess.com home page information hierarchy

The highlighted home page regions show task signposting for Play, Puzzles, Learn, Train, Watch, and Community.

Figure C-02. Chess.com play entry point

The board plus Start Game controls show the action-first pathway for starting a quick chess game.

Figure C-03. Chess.com game board or demo board

The chess board uses direct manipulation and a familiar game-board metaphor.

Figure C-04. Chess.com puzzle page

The puzzle screen shows a learning task with layered onboarding and feedback expectations.

Figure C-05. Chess.com Learn page

The learning surface shows multiple routes that need progressive disclosure for beginners.

Figure C-06. Chess.com navigation menu

The side navigation exposes many features, which helps expert recognition but increases beginner scan load.

Figure C-07. Chess.com feedback and move status

The compact play screen shows how clock, board, and action controls compete for mobile attention.

Figure C-08. Chess.com mobile layout

The mobile layout compresses feature discovery and account prompts into a narrow touch surface.

Figure C-06M. Chess.com mobile navigation

The mobile navigation capture shows how feature-rich navigation shifts behind compact controls.

Figure C-04A. Chess.com puzzle prompt crop

The crop isolates a dense learning prompt layered over the board state.

Figure S-05. Proposed Chess.com beginner home

This is a proposed solution sketch, not observed live UI.

Figure S-07. Proposed Chess.com beginner analysis preset

This is a proposed solution sketch, not observed live UI.

HCI findings

Finding ID	Product	Screenshot figure	Screen or flow	Highlighted UI element	Observed behavior	Persona/context	HCI mapping	Benefit/drawback	Concrete scenario	Severity	Evidence	Improvement direction
F-HCI1	FIFA	F-02	Global navigation	Match Centre, News, Rankings, Tickets & Hospitality	Navigation exposes key football information tasks.	F-P1/F-P2	Information scent; recognition over recall; efficient task entry	Benefit	Lan can enter Match Centre from the top level instead of remembering a direct URL.	High	F-02 and [1][7][8][9]	See related solution direction in PotentialSolutions
F-HCI2	FIFA	F-06	All stories & topics	Category and content-type filters	Story browsing supports exploratory scanning across FIFA topics.	F-P2	Information foraging; hierarchical scanning	Benefit	Ethan narrows from broad news to a tournament story during a short office break.	Medium	F-06 and [2][3]	See related solution direction in PotentialSolutions

Finding ID	Product	Screenshot figure	Screen or flow	Highlighted UI element	Observed behavior	Persona/context	HCI mapping	Benefit/drawback	Concrete scenario	Severity	Evidence	Improvement direction
F-HCI3	FIFA	Source-only [4][5][9]	Ticket discovery	Official/preferred ticket wording and resale/exchange note	Ticket media releases create a clear trust cue.	F-P3	Credibility; error prevention; trust	Benefit	Maria avoids a third-party ticket tab because FIFA identifies FIFA.com/tickets as the source.	High	Source-only [4][5][9] and [4][5][9]	See related solution direction in PotentialSolutions
F-HCI4	FIFA	Source-only [6]	FIFA+ entry	Hero and get-started controls	FIFA+ states the watch proposition and next action.	F-P3	Feedforward; clear CTA; reduced ambiguity	Benefit	Maria can tell that the next step is to sign in or get started before watching.	Medium	Source-only [6] and [6]	See related solution direction in PotentialSolutions
F-HCI5	FIFA	F-10B + [6]	FIFA+ watch rails	Live, highlights, replays, archive, documentaries	FIFA+ supports both live football and time-shifted content.	F-P3	Flexibility; broad retrieval paths	Benefit	Maria can choose a highlight if live content does not fit the family's schedule.	Medium	F-10B + [6] and [6]	See related solution direction in PotentialSolutions
F-HCI6	FIFA	F-09B + [1][6][9]	Ecosystem navigation	FIFA.com, inside.fifa.com, plus.fifa.com, Store, Collect, Rewards	Task paths span several sibling properties.	F-P1/F-P3	Context switching; mental model fragmentation; consistency	Drawback	Lan expects a single football hub but is moved across different hosts for stories, tickets, and video.	High	F-09B + [1][6][9] and [1][6][9]	See related solution direction in PotentialSolutions
F-HCI7	FIFA	Source-only [6]	FIFA+ handoff	DAZN-branded page with login/get-started controls	The watch path changes brand context and account expectations.	F-P3	Continuity break; trust friction; mode boundary	Drawback	Maria pauses because the FIFA+ destination looks like a different service during family planning.	High	Source-only [6] and [6]	See related solution direction in PotentialSolutions
F-HCI8	FIFA	F-10B + [6]	FIFA+ content browsing	Long content rails	Dense rails increase scan cost before a user finds live or archive content.	F-P3	Visual attention; choice overload	Drawback	Maria searches highlights but has to scan many rail items before choosing.	Medium	F-10B + [6] and [6]	See related solution direction in PotentialSolutions
F-HCI9	FIFA	Source-only [5][9]	Ticket status	Check regularly for availability	Ticket status is visible only as repeated-check guidance.	F-P3	Visibility of system status; planning friction	Drawback	Maria cannot tell when new family-trip availability may appear without repeatedly checking.	High	Source-only [5][9] and [5][9]	See related solution direction in PotentialSolutions
F-HCI10	FIFA	F-06 + [1][2][3][7]	Story hub	Article-first cards	Story browsing is strong, but quick tasks require a second jump.	F-P1/F-P2	Task interruption; efficiency gap	Drawback	Lan reads a headline and then has to jump elsewhere for scores or tickets.	Medium	F-06 + [1][2][3][7] and [1][2][3][7]	See related solution direction in PotentialSolutions
C-HCI1	Chess.com	C-01	Homepage	Play, Puzzles, Learn, Train, Watch, Community	Homepage navigation foregrounds core chess tasks.	C-P1/C-P2	Strong information scent; task signposting	Benefit	Minh sees Learn and Puzzles without knowing internal feature names.	High	C-01 and [10]	See related solution direction in PotentialSolutions

Finding ID	Product	Screenshot figure	Screen or flow	Highlighted UI element	Observed behavior	Persona/context	HCI mapping	Benefit/drawback	Concrete scenario	Severity	Evidence	Improvement direction
C-HCI2	Chess.com	C-02	Start game flow	Random opponent, bot, friend, time controls, rated toggle, rating range	Game start is short and flexible.	C-P2	Flexibility; user control; low entry friction	Benefit	Alex starts a blitz game quickly or adjusts time control before matching.	High	C-02 and [11]	See related solution direction in PotentialSolutions
C-HCI3	Chess.com	Source-only [13]	Focus Mode	Expanded board with only essential play controls	Focus Mode hides distractions while preserving clocks and resign/draw actions.	C-P2	Attention support; reduced clutter; task focus	Benefit	Alex makes decisions with a larger board and fewer side panels.	Medium	Source-only [13] and [13]	See related solution direction in PotentialSolutions
C-HCI4	Chess.com	Source-only [15][16]	Game Review	Graph, accuracy, classifications, coach, key moves, retry	Review turns a finished game into concrete feedback.	C-P3	Feedback; reflection; error recovery; external cognition	Benefit	Quynh sees a blunder classification, retries the move, and understands the alternative.	High	Source-only [15][16] and [15][16]	See related solution direction in PotentialSolutions
C-HCI5	Chess.com	Source-only [17]	Analysis Board	Move pieces, setup position, load FEN/PGN, history, collections	Analysis supports expert direct manipulation and artifact transfer.	C-P3	Direct manipulation; expert control; transfer of artifacts	Benefit	Quynh pastes a PGN, changes a line, and compares engine feedback.	High	Source-only [17] and [17]	See related solution direction in PotentialSolutions
C-HCI6	Chess.com	C-05 + [19][20]	Study Plans	Skill-level study guides	Study plans reduce uncertainty about what to learn next.	C-P1	Progressive disclosure; guided learning	Benefit	Minh chooses a beginner plan after puzzles instead of guessing from all lessons.	Medium	C-05 + [19][20] and [19][20]	See related solution direction in PotentialSolutions
C-HCI7	Chess.com	C-06 + [10][18][19][20]	Product surface	Many primary areas and training paths	The broad surface can overwhelm first-time users.	C-P1	Choice overload; weak progressive disclosure at entry	Drawback	Minh sees Play, Learn, Train, Puzzles, and Watch before knowing the best beginner sequence.	Medium	C-06 + [10][18][19][20] and [10][18][19][20]	See related solution direction in PotentialSolutions
C-HCI8	Chess.com	Source-only [12]	Premove	Queued move during opponent turn	Premoves are efficient but risky when the reply is unexpected.	C-P2	Speed versus accuracy; error risk	Drawback	Alex premoves a capture that remains legal but weak after a surprising reply.	High	Source-only [12] and [12]	See related solution direction in PotentialSolutions
C-HCI9	Chess.com	Source-only [13][14]	Focus Mode discovery	Hover-only board-side control	Focus Mode can be hard to discover because related controls appear only near the board boundary.	C-P2	Discoverability; hidden controls	Drawback	Alex never enables Focus Mode because the icon appears only on hover.	Medium	Source-only [13][14] and [13][14]	See related solution direction in PotentialSolutions
C-HCI10	Chess.com	Source-only [15][16][17][19]	Analysis screens	Toggles, charts, lines, classifications, premium gates	Analysis surfaces many controls and access expectations at once.	C-P1/C-P3	Cognitive load; progressive disclosure gap; expectation mismatch	Drawback	Minh opens analysis after a loss and cannot tell which chart or control matters first.	Medium	Source-only [15][16][17][19] and [15][16][17][19]	See related solution direction in PotentialSolutions

ID	Product	Type	Screen or flow	UI element	Observed behavior	Persona/context	HCI mapping	Concrete scenario	Severity	Evidence
F-HCI1	FIFA	Benefit	Global navigation	Match Centre, News, Rankings, Tickets & Hospitality	Navigation exposes key football information tasks.	F-P1/F-P2	Information scent; recognition over recall; efficient task entry	Lan can enter Match Centre from the top level instead of remembering a direct URL.	High	[1][7][8][9]
F-HCI2	FIFA	Benefit	All stories & topics	Category and content-type filters	Story browsing supports exploratory scanning across FIFA topics.	F-P2	Information foraging; hierarchical scanning	Ethan narrows from broad news to a tournament story during a short office break.	Medium	[2][3]
F-HCI3	FIFA	Benefit	Ticket discovery	Official/preferred ticket wording and resale/exchange note	Ticket media releases create a clear trust cue.	F-P3	Credibility; error prevention; trust	Maria avoids a third-party ticket tab because FIFA identifies FIFA.com/tickets as the source.	High	[4][5][9]
F-HCI4	FIFA	Benefit	FIFA+ entry	Hero and get-started controls	FIFA+ states the watch proposition and next action.	F-P3	Feedforward; clear CTA; reduced ambiguity	Maria can tell that the next step is to sign in or get started before watching.	Medium	[6]
F-HCI5	FIFA	Benefit	FIFA+ watch rails	Live, highlights, replays, archive, documentaries	FIFA+ supports both live football and time-shifted content.	F-P3	Flexibility; broad retrieval paths	Maria can choose a highlight if live content does not fit the family's schedule.	Medium	[6]
F-HCI6	FIFA	Drawback	Ecosystem navigation	FIFA.com, inside.fifa.com, plus.fifa.com, Store, Collect, Rewards	Task paths span several sibling properties.	F-P1/F-P3	Context switching; mental model fragmentation; consistency	Lan expects a single football hub but is moved across different hosts for stories, tickets, and video.	High	[1][6][9]
F-HCI7	FIFA	Drawback	FIFA+ handoff	DAZN-branded page with login/get-started controls	The watch path changes brand context and account expectations.	F-P3	Continuity break; trust friction; mode boundary	Maria pauses because the FIFA+ destination looks like a different service during family planning.	High	[6]
F-HCI8	FIFA	Drawback	FIFA+ content browsing	Long content rails	Dense rails increase scan cost before a user finds live or archive content.	F-P3	Visual attention; choice overload	Maria searches highlights but has to scan many rail items before choosing.	Medium	[6]
F-HCI9	FIFA	Drawback	Ticket status	Check regularly for availability	Ticket status is visible only as repeated-check guidance.	F-P3	Visibility of system status; planning friction	Maria cannot tell when new family-trip availability may appear without repeatedly checking.	High	[5][9]
F-HCI10	FIFA	Drawback	Story hub	Article-first cards	Story browsing is strong, but quick tasks require a second jump.	F-P1/F-P2	Task interruption; efficiency gap	Lan reads a headline and then has to jump elsewhere for scores or tickets.	Medium	[1][2][3][7]
C-HCI1	Chess.com	Benefit	Homepage	Play, Puzzles, Learn, Train, Watch, Community	Homepage navigation foregrounds core chess tasks.	C-P1/C-P2	Strong information scent; task signposting	Minh sees Learn and Puzzles without knowing internal feature names.	High	[10]
C-HCI2	Chess.com	Benefit	Start game flow	Random opponent, bot, friend, time controls, rated toggle, rating range	Game start is short and flexible.	C-P2	Flexibility; user control; low entry friction	Alex starts a blitz game quickly or adjusts time control before matching.	High	[11]

ID	Product	Type	Screen or flow	UI element	Observed behavior	Persona/context	HCI mapping	Concrete scenario	Severity	Evidence
C-HCI3	Chess.com	Benefit	Focus Mode	Expanded board with only essential play controls	Focus Mode hides distractions while preserving clocks and resign/draw actions.	C-P2	Attention support; reduced clutter; task focus	Alex makes decisions with a larger board and fewer side panels.	Medium	[13]
C-HCI4	Chess.com	Benefit	Game Review	Graph, accuracy, classifications, coach, key moves, retry	Review turns a finished game into concrete feedback.	C-P3	Feedback; reflection; error recovery; external cognition	Quynh sees a blunder classification, retries the move, and understands the alternative.	High	[15][16]
C-HCI5	Chess.com	Benefit	Analysis Board	Move pieces, setup position, load FEN/PGN, history, collections	Analysis supports expert direct manipulation and artifact transfer.	C-P3	Direct manipulation; expert control; transfer of artifacts	Quynh pastes a PGN, changes a line, and compares engine feedback.	High	[17]
C-HCI6	Chess.com	Benefit	Study Plans	Skill-level study guides	Study plans reduce uncertainty about what to learn next.	C-P1	Progressive disclosure; guided learning	Minh chooses a beginner plan after puzzles instead of guessing from all lessons.	Medium	[19][20]
C-HCI7	Chess.com	Drawback	Product surface	Many primary areas and training paths	The broad surface can overwhelm first-time users.	C-P1	Choice overload; weak progressive disclosure at entry	Minh sees Play, Learn, Train, Puzzles, and Watch before knowing the best beginner sequence.	Medium	[10][18][19][20]
C-HCI8	Chess.com	Drawback	Premove	Queued move during opponent turn	Premoves are efficient but risky when the reply is unexpected.	C-P2	Speed versus accuracy; error risk	Alex premoves a capture that remains legal but weak after a surprising reply.	High	[12]
C-HCI9	Chess.com	Drawback	Focus Mode discovery	Hover-only board-side control	Focus Mode can be hard to discover because related controls appear only near the board boundary.	C-P2	Discoverability; hidden controls	Alex never enables Focus Mode because the icon appears only on hover.	Medium	[13][14]
C-HCI10	Chess.com	Drawback	Analysis screens	Toggles, charts, lines, classifications, premium gates	Analysis surfaces many controls and access expectations at once.	C-P1/C-P3	Cognitive load; progressive disclosure gap; expectation mismatch	Minh opens analysis after a loss and cannot tell which chart or control matters first.	Medium	[15][16][17][19]

Benefits summary

C-D4	Chess.com	Premove blunder risk	High	High	Addressed in PotentialSolutions
C-D5	Chess.com	Focus Mode is hard to discover	Medium	Medium	Addressed in PotentialSolutions

Cross-product comparison

Dimension	FIFA	Chess.com
Task type	Browse, compare, follow, verify, then hand off to FIFA+ for video	Do, review, analyze, train, and enter competitive flows
Target users	Fans checking official football information, tickets, rankings, and video	Players who want fast games, feedback, training, and fair competitive play
Information scent	Strong for official labels; weaker when tasks cross properties [1][6]	Strong action labels on homepage and support flows [10][11]
Learnability	Easy for news/rankings; ticket and watch handoff need clearer status [5][6]	Easy to start; analysis and training depth require guidance [15][17][20]
Cognitive load	Browse surfaces and rails can become dense [2][6]	Feature breadth and analysis controls can overwhelm novices [10][17]
Motivation pattern	Follow official tournaments and national-team context	Immediate play loop plus feedback, puzzles, lessons, and study plans
Trust model	Official source and ticket credibility are central [4][5][9]	Fair play and review credibility shape competitive trust [15][22]
Error risk	Wrong ticket source or lost context during handoff	Queued premove, hidden focus control, and access-limit interruptions
Reflection and feedback	Article reading and ranking lookup; limited personal feedback	Game Review and Analysis give rich post-action reflection [15][16][17]
Accessibility	Official 2026 coverage includes accessibility efforts, but this report focuses on IA and task flow	Focus Mode and board settings support attention but need stronger discovery [13][14]
Speed of first success	Fast for news and rankings; slower for ticket status or watch handoff	Fast for starting a game; slower for understanding review depth

Summary of major drawbacks

The canonical FIFA drawbacks are ecosystem sprawl, FIFA+ handoff discontinuity, FIFA+ rail scan overload, ticket-status uncertainty, and article-to-utility friction. The canonical Chess.com drawbacks are novice menu overload, analysis overload, premium-gating interruption, premove blunder risk, and hidden Focus Mode discovery. Each maps to one explicit finding, persona/context, evidence item, and two solution IDs.

Diagram PR-D1. ProductResearch task flow map. This rendered diagram links observed website tasks to the use cases and HCI findings discussed in the report.

Diagram PR-D2. ProductResearch navigation map

Diagram PR-D2. ProductResearch navigation map. This rendered diagram compares the main information and action areas used as evidence throughout the report.

Appendix A: Screenshot manifest

The full machine-readable screenshot manifest is stored in `assets/figures_manifest.json` and includes raw paths, annotated paths, crops, highlighted regions, claims, HCI concepts, and captions.

Appendix B: Figure list

Figure	Product	Evidence role
F-01 to F-08	FIFA.com	Captured live pages for home, navigation, Match Centre, search, article, competition, and mobile density
F-09B, F-10B, F-08A	FIFA.com	Observed footer, media destination, and mobile detail evidence
C-01 to C-08	Chess.com	Captured live pages for home, play, board, puzzle, learn, navigation, feedback, and mobile layout
C-06M, C-04A	Chess.com	Observed mobile navigation and puzzle detail evidence
S-01, S-02, S-05, S-07	Proposed designs	Clearly labeled solution sketches; never treated as observed UI
