

GroupID-PA1 Weekly Report

Sprint objective

Produce PA1 reports for FIFA.com and Chess.com with visual screenshot evidence and HCI analysis, then package four submission-ready PDFs in GroupID-PA1.zip.

Real team roster

Member	Student ID	Role	Main contribution
Le Minh	21127645	Project Coordinator, Integration Lead, PeerReview Lead, WeeklyReport Lead, Final Packaging Lead	Coordinated scope, integrated final reports, led PeerReview and WeeklyReport evidence, ran final PDF and zip packaging QA.
Nguyen Vu Bach	21127224	FIFA.com Research Lead, FIFA Screenshot Evidence Lead, ProductResearch Co-Lead	Researched FIFA.com, collected official sources, captured and annotated FIFA evidence, and wrote FIFA HCI findings.
Pham Nguyen Gia Bao	20127119	Chess.com Research Lead, Chess.com Screenshot Evidence Lead, ProductResearch Co-Lead	Researched Chess.com, collected official sources, captured and annotated Chess.com evidence, and wrote Chess.com HCI findings.
Trang Minh Nhut	22127318	HCI Analysis Lead, PotentialSolutions Lead, Visual QA Lead	Mapped HCI concepts, led PotentialSolutions, checked figure captions, and verified drawback-to-solution consistency.

Planned meeting schedule

Meeting	Planned date	Attendance
Sprint Planning	2026-06-10	All four members
Weekly Scrum 1	2026-06-14	All four members
Weekly Scrum 2	2026-06-19	All four members
Sprint Review and Retrospective	2026-06-22	All four members

Sprint planning meeting

Field	Detail
Meeting type	Sprint Planning
Planned date	2026-06-10
Attendance	Le Minh, Nguyen Vu Bach, Pham Nguyen Gia Bao, Trang Minh Nhut
Decisions	Product pair locked as FIFA.com and Chess.com; final reports must include visual screenshot evidence; ProductResearch co-led by Nguyen Vu Bach and Pham Nguyen Gia Bao; PotentialSolutions led by Trang Minh Nhut; PeerReview, WeeklyReport, integration, and packaging led by Le Minh; screenshots must be annotated and referenced; four final PDFs must be packaged at the top level of GroupID-PA1.zip.
Task assignments	Le Minh: coordinate scope, manage final checklist, write PeerReview, support WeeklyReport, regenerate PDF and zip. Nguyen Vu Bach: research FIFA.com, collect FIFA sources, capture and annotate FIFA screenshots, write FIFA HCI findings. Pham Nguyen Gia Bao: research Chess.com, collect Chess.com sources, capture and annotate Chess screenshots, write Chess.com HCI findings. Trang Minh Nhut: map HCI concepts, write PotentialSolutions, check figure captions, check consistency between drawbacks and solutions.
Actions	Use official sources first; preserve F- and C-prefix IDs; regenerate PDFs from source after final fixes.

Weekly Scrum 1

Meeting type: Weekly Scrum 1. Planned date: 2026-06-14. Attendance: all four members.

Member	Completed work	Next work	Issues or obstacles	Action needed
Le Minh	Prepared report structure, reviewed PA1 checklist, organized deliverable folders, drafted PeerReview outline.	Integrate ProductResearch sections and prepare QA checklist.	Needs research sections from both product leads before integration.	Remind product leads to finish evidence tables and screenshot captions.
Nguyen Vu Bach	Collected FIFA.com official sources, captured FIFA.com screenshots, drafted FIFA personas and use cases.	Complete FIFA HCI findings and drawback list.	Some FIFA pages use dynamic content and require careful screenshot selection.	Use annotated screenshots and crop images for dense pages.
Pham Nguyen Gia Bao	Collected Chess.com official sources, captured Chess.com screenshots, drafted Chess.com personas and use cases.	Complete Chess.com HCI findings and drawback list.	Some game-board and review features may require account or accessible demo views.	Use available public screens and official support sources when interactive screens are limited.
Trang Minh Nhut	Prepared HCI concept mapping template, reviewed initial screenshots, created solution mapping structure.	Convert drawbacks into HCI-based solutions and check caption quality.	Needs final drawback list from both product leads.	Align drawback IDs with ProductResearch before writing PotentialSolutions.

Weekly Scrum 2

Meeting type: Weekly Scrum 2. Planned date: 2026-06-19. Attendance: all four members.

Member	Completed work	Next work	Issues or obstacles	Action needed
Le Minh	Integrated draft reports, reviewed PeerReview script, checked filenames and zip requirements.	Finalize WeeklyReport, regenerate PDFs, run final scan.	Must ensure no old product names or disallowed wording remain.	Run repo-wide text scan and PDF extraction scan.
Nguyen Vu Bach	Finished FIFA.com overview, personas, use cases, annotated figures, benefits, drawbacks, and HCI findings.	Review ProductResearch PDF after regeneration.	Some FIFA figures are visually dense.	Use crop figures and captions to make highlighted regions clearer.
Pham Nguyen Gia Bao	Finished Chess.com overview, personas, use cases, annotated figures, benefits, drawbacks, and HCI findings.	Review ProductResearch and PotentialSolutions after regeneration.	Chess.com has many features, so analysis can become too broad.	Keep analysis tied to play, puzzles, learn, review, and navigation tasks.
Trang Minh Nhut	Completed drawback-to-solution matrix, impact-effort table, rollout plan, and visual QA checks.	Review final screenshots, captions, and solution consistency.	Must ensure every solution maps to a real drawback.	Compare PotentialSolutions against ProductResearch before PDF export.

Sprint review

Field	Detail
Meeting type	Sprint Review and Retrospective
Planned date	2026-06-22
Attendance	Le Minh, Nguyen Vu Bach, Pham Nguyen Gia Bao, Trang Minh Nhut
What went well	Product pair is consistent as FIFA.com and Chess.com. Visual evidence is strong, with raw screenshots, annotated screenshots, crop images, and figure captions. ProductResearch, PotentialSolutions, and PeerReview are mostly complete. Old products were removed from final deliverables.
What went wrong	WeeklyReport initially used generic member labels. Scrum records were initially summarized at meeting level. PeerReview owner fields initially used generic owner names. WorkDivision document required Vietnamese regeneration.
Causes	Team data was not centralized early enough. Generated reports reused default member labels. Final audit was performed after PDF generation, so some source problems remained in the generated PDFs.
What to improve	Keep real member data in a single source-of-truth file. Run text scans before PDF export. Review WeeklyReport separately because it has process-specific grading requirements. Validate generated PDF text, not only markdown sources.
Lessons learned	A strong visual report still fails strict readiness if team evidence and scrum details are incomplete. Per-member progress records are needed for WeeklyReport. Final packaging must be regenerated after any source fix.

Workload matrix

Member	Role	Research	Writing	Review	Packaging	Total
Le Minh	Coordinator/integration/PeerReview/WeeklyReport/packaging	3	5	5	4	17
Nguyen Vu Bach	FIFA.com research and visual evidence	6	6	3	1	16
Pham Nguyen Gia Bao	Chess.com research and visual evidence	6	6	3	1	16
Trang Minh Nhut	HCI analysis, PotentialSolutions, visual QA	4	7	4	1	16

Final submission checklist

Deliverable	Expected filename	Acceptance status
ProductResearch PDF	GroupID-PA1-ProductResearch.pdf	Contains FIFA.com and Chess.com evidence, figures, personas, use cases, HCI findings, references, and strict context labels.
PotentialSolutions PDF	GroupID-PA1-PotentialSolutions.pdf	Contains drawback-to-solution mapping, solution details, priority/effort rationale, rollout plan, and solution figures.
PeerReview PDF	GroupID-PA1-PeerReview.pdf	Contains seven-minute script, slide plan, internal rehearsal feedback, and real owner names.
WeeklyReport PDF	GroupID-PA1-WeeklyReport.pdf	Contains real roster, planned dates, sprint planning, two per-member scrum records, sprint review, workload matrix, and checklist.
Submission package	GroupID-PA1.zip	Contains exactly the four final PDFs at top level.

Diagram C. Sprint timeline

Figure W-01. Weekly sprint timeline and delivery sequence.

flowchart LR
A[Day 1 Planning] --> B[Days 2 to 3 Sources]
B --> C[Days 4 to 6 Personas and Use Cases]
C --> D[Days 7 to 8 HCI Findings]
D --> E[Days 9 to 11 Solutions and Drafts]
E --> F[Days 12 to 13 Rehearsal and QA]
F --> G[Day 14 Review, PDFs, Zip]

Text fallback: Planning first, research next, analysis after that, then solution writing, then QA and packaging.
