

PROJECT ASSIGNMENT 2

Group10-PA2 Peer Review

Pre-review presentation and evidence-completion record

FIFA.com and Chess.com

Course	CSC13112 - UI/UX Design, FIT-HCMUS
Group	Group10
Team	Le Minh (21127645); Nguyen Vu Bach (21127224); Pham Nguyen Gia Bao (20127119); Trang Minh Nhut (22127318)
Evidence date	Local evidence audited through 30 July 2026
Document type	Evidence-based redesign report
Status	INCOMPLETE - verified PA2 presentation feedback is absent

1. Evidence status

Evidence blocker: No verified PA2 presentation date, duration, presenter list, audience record, commenter identity, feedback/question, group response, decision, owner, or revision evidence was found. This file cannot be completed truthfully until that evidence is supplied.

2. Presentation plan (5-10 minutes)

Time	Slide	Speaker focus
0:00-0:45	1. Scope and evidence boundary	Explain PA1 continuity, 105 screenshots, and absence of external participants.
0:45-1:45	2. FIFA task findings	Show ticket landing and partner-boundary evidence without unsupported claims.
1:45-2:45	3. Chess task findings	Show learning/analysis entry and positive guided-learning baseline.
2:45-3:45	4. Affinity and prioritization	Explain 11 clusters, rubric, and two tough problems.
3:45-5:15	5. FIFA concepts	Contrast dashboard, concierge, and alert-first planner.
5:15-6:45	6. Chess concepts	Contrast preset, conversational coach, and visual story.
6:45-7:45	7. Use cases and PA3	Show system boundaries and six alternative flows.
7:45-9:00	8. Questions	Capture commenter name, exact question, response, and revision decision.

3. Speaking outline

- State what is observed, inherited from PA1, inferred, and proposed.
- Do not present personas as interview-derived or outcomes as measured.
- Point to exact ticket cards, destination branding, lesson lists, and analysis-entry controls.
- Ask reviewers whether the two tough problems are severe, distinct, and suitable for PA3 alternatives.
- Record feedback verbatim enough to preserve meaning, but do not invent or paraphrase absent comments.

4. Missing real feedback record

Required field	Verified value
Presentation date	Not available - evidence blocker.
Duration	Not available - evidence blocker.
Presenters	Not available - evidence blocker.
Audience	Not available - evidence blocker.
Commenter name	Not available - evidence blocker.
Comment or question	Not available - evidence blocker.
Group response	Not available - evidence blocker.
Decision and rationale	Not available - evidence blocker.
Owner	Not available - evidence blocker.
Affected document/page	Not available - evidence blocker.
Revision and revision evidence	Not available - evidence blocker.

5. Feedback and revision log status

No commenter row or revision row is created because an empty or synthetic row could be mistaken for real feedback. Once evidence exists, each row must preserve the comment's meaning and include response, decision, rationale, owner, affected document/page, revision, and revision evidence.

6. Completion gate

- Add verified presentation metadata and audience/presenter records.
- Add each real commenter and feedback/question without changing its meaning.
- Record group response, decision, rationale, owner, affected document/page, revision, and revision evidence.
- Regenerate affected reports and the six-file ZIP.
- Remove the incomplete label only after the record and revisions are validated.
