

PROJECT ASSIGNMENT 2

Group10-PA2 User Research

Source analysis and structured try-it-yourself artifact walkthrough

FIFA.com and Chess.com

Course	CSC13112 - UI/UX Design, FIT-HCMUS
Group	Group10
Team	Le Minh (21127645); Nguyen Vu Bach (21127224); Pham Nguyen Gia Bao (20127119); Trang Minh Nhut (22127318)
Evidence date	Local evidence audited through 30 July 2026
Document type	Evidence-based redesign report

Contents

1. Scope and evidence boundary	3
2. Research questions	3
3. Methods	3
4. Walkthrough-session protocol and verified record	3
5. User and task characteristics	4
6. Focal task findings	6
7. Provisional role-based proto-personas	13
8. Work models	16
9. Insights and limitations	19
10. Traceability	20
11. References	20
12. Evidence appendix	20

1. Scope and evidence boundary

Observed evidence: The approved corpus contains 105 local website captures (54 FIFA and 51 Chess.com). Captures prove interface states only. No participant behavior, quotation, preference, completion time, or success rate is inferred.

The study continues the PA1 product pair and uses two permitted methods: source analysis and a structured try-it-yourself artifact walkthrough (PA2-LKDuy-2026-Public.pdf, p. 2). No external participant session is represented. User experience is defined relative to specified users, goals, and context; those contextual fields are therefore stated explicitly and kept provisional where direct research is absent (LN01 - Introduction - v2, pp. 20, 24).

2. Research questions

- RQ-F1/F2: What visible structures support fixture checking and official information lookup?
- RQ-F3/F4/F5: What ticket status, destination boundary, and future-action support is visible before action?
- RQ-C1/C2: What choices precede play, and how is an immediate puzzle action signposted?
- RQ-C3/C4/C5: How is a learning path continued, what is visible at analysis entry, and what evidence could support a comprehensible review narrative?
- Across products: which goals, contexts, capabilities, artifacts, and breakdowns can be documented without behavioral inference?

3. Methods

Method	Material	Procedure	Validity boundary
Source analysis	PA1 ProductResearch, PotentialSolutions, PeerReview, WeeklyReport; PA1/PA2 briefs; LN01-LN04.	Preserve canonical IDs; compare claims with the current approved captures; cite report and page.	Prior PA1 statements remain documentary evidence, not new PA2 participant evidence.
Structured artifact walkthrough	evidence-index.csv, capture-manifest.csv, approved images, evidence-validation.md.	Trace each focal task from a named start state to a visible decision/end state; record controls, branches, missing information, and artifacts.	Researcher inspection of artifacts only; screenshots do not establish what a user did.
Evidence-gap audit	Workspace files and supplied attachments.	Search for session notes, recordings, surveys, brainstorming records, feedback, meetings, and ownership.	Absence is reported as a blocker; it is never filled with synthetic data.

Task analysis documents goals, preconditions, subtasks, exceptions, context, frequency assumptions, and other involved parties (LN04 - Task Analysis, pp. 6, 39-40, 48). Walk-through is an accepted refinement technique (LN04, p. 44).

4. Walkthrough-session protocol and verified record

Member-specific limitation: No verified PA2 record names the researcher/member who performed a walkthrough, its duration, or a contemporaneous recording method. The table below is the

reproducible artifact protocol used for this report, not a reconstructed human-session claim.

Protocol field	Verified value or limitation
Researcher/member	Not recorded in a valid PA2 walkthrough log.
Date	Capture-manifest records approved captures on 30 July 2026; this is capture metadata, not a participant-session date.
Duration	Not recorded; no duration is reported.
Device	Manifest viewport labels and pixel dimensions are used only for the associated capture (desktop or mobile).
Task	FR-T1-FR-T4 and CR-T1-CR-T4, defined below.
Start/end state	Named visible page/state from evidence-index.csv; no unobserved transition is asserted.
Success condition	Information/action that must be visible at the decision point; this is a task criterion, not a measured success.
Recording	Approved PNG capture, evidence-index row, manifest metadata, and traceability-matrix row.
Observation wording	Use 'researcher observed in the artifact' for pixels/controls; never 'the user did'.

5. User and task characteristics

Task	Goal	Context	Success condition	Evidence	PA1
FR-T1	Check today's fixtures/results	Short mobile or desktop check	Today/date anchor; visible match state	F2-E03, E04, E17	F-D5
FR-T2	Search official World Cup information	Research or tournament following	Find an official, relevant result	F2-E05, E06, E07, E08	F-D5
FR-T3	Verify ticket availability and next official action	Trust-sensitive planning	Understand status before leaving FIFA.com	F2-E09, E18	F-D4
FR-T4	Move to FIFA+ or sibling property with orientation	Watch or ecosystem transition	Understand destination and return path	F2-E10-E16, E20	F-D1, F-D2, F-D3
CR-T1	Start a game or bot session	Short or focused play	Reach an appropriate start state	C2-E02-E04, E13, E16	C-D1
CR-T2	Solve a puzzle	Practice session	Identify the immediate puzzle	C2-E05, E06, E14	C-D1

Task	Goal	Context	Success condition	Evidence	PA1
			action		
CR-T3	Find beginner lesson and continue path	Home/school learning	Select and continue one coherent path	C2-E07-E09, E12, E15	C-D1
CR-T4	Open analysis and identify next action	Post-game reflection	Know what to do before advanced detail	C2-E10	C-D2
Persona		Domain experience	Application experience	Capabilities	Constraints / risk
F-P1 Casual football fan		Basic to moderate	Occasional FIFA.com	Recognizes teams, dates, scores	Interrupted attention; mobile scanning
F-P2 Tournament follower		Moderate to high	Repeat tournament browsing	Compares fixtures, rankings, stories	Many parallel information needs
F-P3 Trust-sensitive planner		Moderate	Cross-property research	Checks official source and destination	Ticket risk; identity/payment boundary
C-P1 Beginner learner		Low	New or early-stage	Can follow clear guided steps	Low chess vocabulary; choice overload
C-P2 Competitive player		High	Frequent play	Fast board manipulation	Time pressure; motor accuracy
C-P3 Returning player		Moderate	Intermittent	Recognizes board and common tasks	Forgets feature location and analysis meaning

6. Focal task findings

Figure UR-01. Observed state: Match Centre with gender control, date rail, search, live toggle, date, sort and filter controls, match rows, tables, and latest results. Supported claim: Date-based mental model; visible match status; multiple narrowing controls; long scanning surface. Limitation: A measured completion time or participant difficulty.

Source: capture-work/fifa/desktop/fifa-06-match-centre.png; URL: <https://www.fifa.com/en/match-centre>; captured: 2026-07-30 14:47:35 +07:00

Related: F-P1; F-P2; FR-T1

Researcher observed the listed controls and content hierarchy in this artifact. Any expected redesign benefit remains a PA3 hypothesis.

Figure UR-02. Observed state: Tickets and Hospitality landing page with tournament logos, ticket and hospitality cards, mixed register-interest and buy-now labels, other tournaments, news, and footer. Supported claim: Tournament-based ticket entry; card destinations; no consolidated cross-tournament status dashboard. Limitation: Seat map; waiting room; resale dashboard; verified partner redirect.

Source: capture-work/fifa/desktop/fifa-20-tickets-hospitality-landing.png; URL: <https://www.fifa.com/en/tickets>; captured: 2026-07-30 14:54:42 +07:00

Related: F-P3; FR-T3

Researcher observed a ticket landing decision surface organized by tournament cards. The captured state supports a need to compare visible options; it does not prove universal absence across every FIFA ticket channel.

Figure UR-03. Observed state: Dark DAZN-hosted FIFA+ page with FIFA+ hero, sign-in controls, navigation, event cards, and media rails. Supported claim: Brand and account boundary; different IA; dense watch rails; need for handoff feedforward. Limitation: A tested trust failure or universal confusion.

Source: capture-work/fifa/desktop/fifa-35-fifa-plus-dazn-landing.png; URL: <https://www.plus.fifa.com/>; captured: 2026-07-30 15:03:26 +07:00

Related: F-P3; FR-T4

Researcher observed the listed controls and content hierarchy in this artifact. Any expected redesign benefit remains a PA3 hypothesis.

Figure UR-04. Observed state: Mobile Tickets and Hospitality page with stacked cards, horizontal carousels, news, and footer. Supported claim: Narrow-screen ticket discovery; card-based selection and long continuation. Limitation: Unified status dashboard; waiting room; partner redirect.

Source: capture-work/fifa/mobile/fifa-51-tickets-mobile.png; URL: <https://www.fifa.com/en/tickets>; captured: 2026-07-30 15:13:08 +07:00

Related: F-P3; FR-T3

Researcher observed the listed controls and content hierarchy in this artifact. Any expected redesign benefit remains a PA3 hypothesis.

Figure UR-05. Observed state: Play entry with board, clocks, time control, Start Game, Custom Challenge, Play a Friend, Tournaments, navigation, and advertisement. Supported claim: Direct board mental model; fast-play options; competing controls and advertising. Limitation: Active game in progress.

Source: [capture-work/chess/desktop/chess-05-play-entry.png](https://www.chess.com/play/online); URL: <https://www.chess.com/play/online>; captured: 2026-07-30 15:15:04 +07:00

Related: C-P1; C-P2; C-P3; CR-T1

Researcher observed the listed controls and content hierarchy in this artifact. Any expected redesign benefit remains a PA3 hypothesis.

Figure UR-06. Observed state: Lessons page with category tabs, upgrade messaging, learning rank, ads, app promotion, long course list, pagination, and footer. Supported claim: Multiple learning categories; paid messaging and ads near learning content; long course list. Limitation: A specific lesson completed or premium entitlement interruption.

Source: capture-work/chess/desktop/chess-24-lessons-landing-loaded.png; URL: <https://www.chess.com/lessons>; captured: 2026-07-30 15:25:36 +07:00

Related: C-P1; C-P3; CR-T3

Researcher observed the listed controls and content hierarchy in this artifact. Any expected redesign benefit remains a PA3 hypothesis.

Figure UR-07. Observed state: Learn-to-Play board with progressive lesson path, prompt, and Next Lesson control. Supported claim: Progressive guided-learning pattern; clear next action. Limitation: Measured learning improvement.

Source: capture-work/chess/desktop/chess-26-learn-page.png; URL: <https://www.chess.com/learn>; captured: 2026-07-30 15:26:44 +07:00

Related: C-P1; CR-T3

Researcher observed the listed controls and content hierarchy in this artifact. Any expected redesign benefit remains a PA3 hypothesis.

Figure UR-08. Observed state: Analysis entry board with Set Up Position, Explore, Game Search, Game Collections, import/upload options, and Start Analysis. Supported claim: Advanced entry exposes several paths and controls. Limitation: Completed review; engine lines; chart; classifications; beginner explanation.

Source: capture-work/chess/desktop/chess-29-analysis-board.png; URL: <https://www.chess.com/analysis>; captured: 2026-07-30 15:28:05 +07:00
Related: C-P1; C-P3; CR-T4

Researcher observed multiple analysis-entry and setup paths. The artifact does not show a completed Game Review, engine lines, move classifications, or demonstrated user overload.

7. Provisional role-based proto-personas

Status: These are role-based proto-personas derived from PA1 and artifact analysis. They have no invented names, ages, quotations, or direct-research claims.

F-P1 - Casual fixture checker (provisional)

Attribute	Provisional profile
Role	Casual fixture checker
Environment	Phone during a short, interruptible check
Goals and tasks	Check today's fixtures or results
Capabilities	Recognizes dates, teams, score states, and common navigation labels

Attribute	Provisional profile
Domain/application experience	As stated in Section 5; provisional and not measured.
Constraints	Low attention; long vertical surfaces
Artifacts	Match rows and date/status labels
Distinct scenario	Scenario: opens Match Centre, anchors on the current date, scans a relevant match state, and exits once the result is visible.
Success criteria	Visible date and match state without claiming measured speed.
Evidence basis	F2-E03/E17; Group10-PA1-ProductResearch, pp. 3, 5

F-P2 - Tournament information follower (provisional)

Attribute	Provisional profile
Role	Tournament information follower
Environment	Laptop during a research or follow-up session
Goals and tasks	Compare official tournament, ranking, and article information
Capabilities	Moderate football vocabulary; repeat web browsing
Domain/application experience	As stated in Section 5; provisional and not measured.
Constraints	Mixed result types; modal or article interruption
Artifacts	Search cards, tournament identity, ranking table
Distinct scenario	Scenario: searches an official tournament topic, distinguishes result types, opens one source, then relocates the tournament context.
Success criteria	Official source and context remain identifiable.
Evidence basis	F2-E05-E08; Group10-PA1-ProductResearch, pp. 3, 6-7

F-P3 - Trust-sensitive ticket planner (provisional)

Attribute	Provisional profile
Role	Trust-sensitive ticket planner
Environment	Laptop plus phone across repeated planning checks
Goals and tasks	Determine current visible option and official destination before leaving FIFA.com
Capabilities	Moderate domain knowledge; checks source identity and action labels

Attribute	Provisional profile
Domain/application experience	As stated in Section 5; provisional and not measured.
Constraints	Money/identity boundary; incomplete visible status
Artifacts	Tournament card, status summary, partner preview, saved plan
Distinct scenario	Scenario: selects a tournament, compares sale/hospitality/waiting labels, reviews the named destination, and chooses act, wait, or stay.
Success criteria	Decision can be made without inventing unavailable seat or resale data.
Evidence basis	F2-E09-E13/E18; Group10-PA1-PotentialSolutions, pp. 6, 8

C-P1 - Beginner learner (provisional)

Attribute	Provisional profile
Role	Beginner learner
Environment	Home or school on laptop/phone
Goals and tasks	Choose one comprehensible learning or review action
Capabilities	General web navigation; limited chess/application vocabulary
Domain/application experience	As stated in Section 5; provisional and not measured.
Constraints	Many first-level routes; analysis entry lacks completed review explanation
Artifacts	Board, lesson card, review card, explanation
Distinct scenario	Scenario: opens a completed game or position, selects Beginner Review, reads one critical point, tries the move, and continues to one relevant practice item.
Success criteria	One next action is understandable before advanced depth.
Evidence basis	C2-E01/E07/E08/E10/E12/E15; Group10-PA1-ProductResearch, pp. 3, 10-12

C-P2 - Focused competitive player (provisional)

Attribute	Provisional profile
Role	Focused competitive player
Environment	Desktop during time-sensitive play

Attribute	Provisional profile
Goals and tasks	Start an appropriate game efficiently
Capabilities	High chess and application experience; fast board manipulation
Domain/application experience	As stated in Section 5; provisional and not measured.
Constraints	Time pressure and motor accuracy
Artifacts	Board, clock, time control, start action
Distinct scenario	Scenario: opens Play, confirms time control, starts the intended game route, and retains a stable board focus.
Success criteria	Chosen start state is visible and reversible before play.
Evidence basis	C2-E02/E13; Group10-PA1-ProductResearch, pp. 3, 10-11

C-P3 - Returning learning player (provisional)

Attribute	Provisional profile
Role	Returning learning player
Environment	Intermittent laptop/phone sessions
Goals and tasks	Resume a coherent learning path and regain analysis orientation
Capabilities	Moderate chess knowledge; incomplete memory of feature locations
Domain/application experience	As stated in Section 5; provisional and not measured.
Constraints	Reorientation after gaps; advanced terminology
Artifacts	Lesson path, board position, analysis entry, learning link
Distinct scenario	Scenario: returns after a gap, recognizes a prior learning artifact, opens a review, and selects one relevant lesson or puzzle.
Success criteria	Continuation is identifiable without removing optional expert controls.
Evidence basis	C2-E04/E08-E10/E16; Group10-PA1-ProductResearch, pp. 3, 12

8. Work models

The models separate people/places/artifacts and coordination (flow), intent-trigger-steps-branches-loops-breakdowns (sequence), and artifact-information-action-downstream decision-breakdown (artifact). They are provisional because no direct observation session exists.

WM-F1 FIFA Ticket-Planning Flow**Breakdowns / decision risks**

Figure WM-F1. FIFA flow model: people/groups, virtual places, artifacts, directed coordination, and ticket-planning breakdowns.

Source: *generated-diagrams/wm-f1-ticket-planning.png*

Related: *Product-specific provisional roles and focal tasks*

9. Insights and limitations

- Both products expose recognizable domain artifacts, but the decision burden differs: FIFA asks users to verify information and boundaries; Chess.com asks users to prioritize actions and interpret depth.

- Mobile layouts preserve major tasks through stacking, while increasing vertical continuation and reducing simultaneous overview.
- A positive baseline exists in Chess.com's Learn-to-Play path: a visible Next Lesson action demonstrates how one clear continuation can coexist with a rich product.
- The selected problems are TP-FIFA ticket confidence and TP-CHESS beginner learning/review priority.
- No external participant behavior, interview, survey, quotation, observation transcript, or measured outcome exists.
- No verified member/date/duration record exists for a human walkthrough.
- Screenshots are time-bound states and cannot establish universal product behavior.
- The Chess analysis capture is entry-only; it does not validate completed Game Review overload.
- Role-based proto-personas and work models require future validation with representative users.

10. Traceability

Problem	Personas	Tasks	Evidence	PA1 continuity	PA3 direction
TP-FIFA	F-P3	FR-T3, FR-T4	F2-E09, E10, E11, E18	F-D2/F-D4; PA1 PotentialSolutions pp. 6, 8	F-A1/F-A2/F-A3; F-UC01-F-UC06
TP-CHESS	C-P1, C-P3	CR-T3, CR-T4	C2-E01, E07, E08, E10, E12, E15	C-D1/C-D2; PA1 PotentialSolutions pp. 11-12	C-A1/C-A2/C-A3; C-UC01-C-UC06

ID	State	Supported claim	Unsupported claim
F2-E01	Full homepage with global header, tournament circles, stacked sections, footer, and a promotional modal over first-view content.	Promotional interruption; broad hierarchy; task-entry competition.	Clean default homepage; cookie banner; distinct navigation-open state.
F2-E02	Long mobile homepage with compact header, stacked content, ranking content, and footer.	Mobile density; long vertical scanning; compact navigation.	Open mobile menu.
F2-E03	Match Centre with gender control, date rail, search, live toggle, date, sort and filter controls, match rows, tables, and latest results.	Date-based mental model; visible match status; multiple narrowing controls; long scanning surface.	A measured completion time or participant difficulty.
F2-E04	Match Centre dimmed behind an open A-to-Z Competitions filter drawer.	Filter structure; added scan and selection work; panel-to-results relationship.	A selected competition result.
F2-E05	Search results for world cup with content-type and date filters, mixed article cards, sorting, and pagination.	Mixed-content search; comparison among result types; filtering and pagination.	User success rate or search relevance quality.

ID	State	Supported claim	Unsupported claim
F2-E06	Ticketing media-release page with header, hero, article content, a large sparse body interval, related content, and footer.	Article structure; utility action is not persistently visible; captured body includes a long sparse interval.	Universal production loading defect; full body-content assessment.
F2-E07	Tournament landing page covered by a registration-interest modal.	Modal interruption; obscured browsing context.	Dismissed modal.
F2-E08	Men's World Ranking page with ranking cards, table, explanation, media, related articles, and footer.	Dedicated official ranking content; separation of reading and utility navigation.	Participant comprehension or ranking accuracy.
F2-E09	Tickets and Hospitality landing page with tournament logos, ticket and hospitality cards, mixed register-interest and buy-now labels, other tournaments, news, and footer.	Tournament-based ticket entry; card destinations; no consolidated cross-tournament status dashboard.	Seat map; waiting room; resale dashboard; verified partner redirect.
F2-E10	FIFA-branded page with assistant-referee flag image and an error or unavailable-state message.	Captured entry route does not expose watch content; possible continuity loss in this state.	Every FIFA+ session fails.
F2-E11	Dark DAZN-hosted FIFA+ page with FIFA+ hero, sign-in controls, navigation, event cards, and media rails.	Brand and account boundary; different IA; dense watch rails; need for handoff feedforward.	A tested trust failure or universal confusion.
F2-E12	DAZN-hosted FIFA+ landing page darkened by a cookie-preferences panel.	Consent handling adds a step before content access.	A distinct rail state.
F2-E13	Unobstructed upper portion of the FIFA+ landing page with hero, category controls, and event cards.	Normal landing layout; hero, categories, and media entry.	Seven distinct rail states.
F2-E14	Bright retail page with store-specific header, merchandising hero, product grids, category tiles, and retail footer.	Cross-property visual and task-model change; retail navigation differs from information navigation.	Ticket availability or FIFA.com navigation continuity.
F2-E15	Dark FIFA Collect marketplace with subscription prompt, collectibles, clubs, prices, filters, and marketplace language.	Cross-property mental-model change; separate transaction vocabulary and structure.	Conventional merchandise shopping flow.
F2-E16	Black FIFA Rewards page with Join Now, tier cards, FAQs, and FIFA footer.	Distinct sibling-property identity; account-oriented reward task.	A completed sign-up or reward redemption.

ID	State	Supported claim	Unsupported claim
F2-E17	Mobile Match Centre with compact header, gender control, match groups, latest results, load-more control, and long footer.	Mobile fixture checking; long vertical task surface.	Open filter menu or measured scroll effort.
F2-E18	Mobile Tickets and Hospitality page with stacked cards, horizontal carousels, news, and footer.	Narrow-screen ticket discovery; card-based selection and long continuation.	Unified status dashboard; waiting room; partner redirect.
F2-E19	Mobile ticketing article with header, hero, body content separated by a long sparse interval, related topics, and footer.	Little persistent task continuation; long mobile reading surface.	Full article comprehension or universal loading defect.
F2-E20	Mobile FIFA+ entry route with assistant-referee flag and error or unavailable-state message.	Mobile entry failure in the captured state.	Normal FIFA+ mobile landing page.
C2-E01	Long homepage with persistent left navigation, Play hero, Lessons, Bots, Puzzles, Watch, app promotion, and footer.	Feature-rich entry; recognition of categories; many first-level routes; long scan.	A user preference for the whitespace.
C2-E02	Play entry with board, clocks, time control, Start Game, Custom Challenge, Play a Friend, Tournaments, navigation, and advertisement.	Direct board mental model; fast-play options; competing controls and advertising.	Active game in progress.
C2-E03	Skill-level modal over the Play page with Sign Up, Log In, and Play as a Guest.	Account/onboarding interruption; skill-level setup decision.	A completed custom-game configuration.
C2-E04	Bot-selection page with board preview, bot categories and levels, options, Play button, navigation, and advertisement.	Many choices before bot play; category and difficulty structure.	Active game; move feedback; premove; Focus Mode.
