

GroupID-PA1 Peer Review Preparation: FIFA and Chess.com

Seven-minute script

Le Minh opens by naming the pair: FIFA and Chess.com web experiences. The first contrast is task posture: FIFA is browse, compare, and follow, while Chess.com is do, review, and improve. Le Minh then explains the official-source protocol and why numbered references are used. Trang Minh Nhut introduces six personas and emphasizes context: short campus browsing, office scanning, trust-sensitive ticket planning, beginner learning, blitz play, and deep review. Nguyen Vu Bach presents FIFA findings, starting with navigation and official ticket trust, then moving into the drawbacks of ecosystem sprawl, FIFA+ continuity, dense watch rails, ticket status uncertainty, and article-to-utility friction. Pham Nguyen Gia Bao presents Chess.com findings, showing how Play, Puzzles, Learn, Game Review, Analysis, and Study Plans support action and reflection, then explaining risks from feature overload, premove execution, hidden Focus Mode controls, and complex analysis screens. Trang Minh Nhut closes the design portion with quick wins and deeper redesigns. Le Minh finishes with the two-week RUP plus Scrum plan, peer-review feedback loop, citation QA, PDF text extraction, old-term scan, and zip packaging.

Two-person website ownership

Website	Owners	Presentation responsibility
FIFA.com	Le Minh and Nguyen Vu Bach	Le Minh: opening, scope, integration, final QA. Nguyen Vu Bach: research findings and evidence.
Chess.com	Pham Nguyen Gia Bao and Trang Minh Nhut	Pham Nguyen Gia Bao: research findings and evidence. Trang Minh Nhut: HCI mapping, solutions, visual QA.

Cross-report traceability

Finding	Drawback	Solution	Revision	Owner
F-HCI6	F-D1	F-S1/F-S2	Clarify cross-property navigation	Le Minh and Nguyen Vu Bach
C-HCI7	C-D1	C-S1/C-S2	Reduce novice feature overload	Pham Nguyen Gia Bao and Trang Minh Nhut

Diagram PE-D1. PeerReview traceability. This rendered diagram connects slides, evidence, internal rehearsal feedback, revision actions, and real team owners.

Slide outline

Slide	Topic	Purpose	Speaker	Time
1	Scope and selected pair	FIFA browse-first web ecosystem and Chess.com action-first web platform; Figure F-01 and Figure C-01	Le Minh	0:45
2	Evidence method and official source protocol	Official pages first; Playwright screenshots and manifest; Figure F-04 and Figure C-02	Le Minh	0:55
3	Personas and contexts	Six personas with task, device, attention, trust, and learning contexts; Figure F-08 and Figure C-08	Trang Minh Nhut	1:00
4	FIFA findings	Navigation, Match Centre, mobile interruption, article density, and handoff drawbacks; Figure F-02, Figure F-04, Figure F-06, Figure F-08	Nguyen Vu Bach	1:10
5	Chess.com findings	Play, board, puzzles, Learn, navigation, and feedback density; Figure C-02, Figure C-03, Figure C-04, Figure C-05, Figure C-06	Pham Nguyen Gia Bao	1:10
6	Solution priorities	Quick wins versus deeper redesigns and impact-effort rationale; Figure S-01 to Figure S-08	Trang Minh Nhut	1:10
7	Sprint plan, QA, and packaging	Two-week RUP plus Scrum process, visual QA, PDF regeneration, zip validation; Figure F-09 and Figure C-09	Le Minh	0:50

Likely questions and prepared answers

Question	Prepared answer
Why pair FIFA with Chess.com?	They are both high-traffic web experiences, but FIFA is browse-first while Chess.com is action-first, so the contrast exposes different HCI tradeoffs.
Which site is stronger for fast task completion?	Chess.com is stronger for immediate action because Play is primary and the start-game flow is short. FIFA is fast for official labels but slower when tasks cross properties.
Which site carries more scan load?	FIFA+ and Chess.com analysis both carry scan load; FIFA+ uses dense rails, while Chess.com analysis exposes charts, toggles, lines, and access expectations.
Which site shows better feedback after action?	Chess.com, because Game Review and Analysis provide graph, classifications, retry, and engine feedback after a completed game.
Why is FIFA+ a continuity problem?	The user moves from FIFA information pages to a DAZN-branded watch page with sign-in/get-started controls, creating trust and mode-boundary friction.
Why is remove both a feature and a risk?	It saves time in blitz, but it can legally execute after an unexpected reply and create a blunder.
How did the team avoid generic UX claims?	Every finding names page or flow, control, user, context, principle, scenario, severity, and evidence.
Which redesign gives best impact for effort?	F-S3 and C-S3 are strong low-effort wins: the handoff explainer reduces trust friction and the beginner analysis preset reduces cognitive load.

Mock feedback entries

These entries are mock/internal rehearsal feedback because real classroom peer feedback was not available in the repository.

Reviewer	Role	Feedback	Response/revision	Owner	Status
Nora Lee	Mock/internal rehearsal peer	FIFA ticket trust needs a stronger official-source cue.	Added F-HCI3, F-D4, F-S7, and F-S8 with FIFA.com/tickets citations.	Nguyen Vu Bach	Done
Omar Khan	Mock/internal rehearsal peer	Explain why FIFA+ is not just another page.	Added DAZN-branded handoff risk, explainer card, and shared breadcrumb solution.	Trang Minh Nhut	Done
Jin Park	Mock/internal rehearsal peer	Chess.com beginner analysis sounds too expert-focused.	Added C-S3 beginner preset and C-S4 inline glossary.	Trang Minh Nhut	Done
Mira Vo	Mock/internal rehearsal peer	Premove needs an error-prevention solution.	Added premove queue preview and fast clear shortcut.	Pham Nguyen Gia Bao	Done
Sam Patel	Mock/internal rehearsal peer	Focus Mode discovery should cite the hover behavior.	Linked C-HCI9 to board-size and Focus Mode support pages.	Pham Nguyen Gia Bao	Done
Hana Lim	Mock/internal rehearsal peer	The pair needs a clearer comparison logic.	Reframed FIFA as browse, compare, follow and Chess.com as do, review, improve.	Le Minh	Done

Reviewer	Role	Feedback	Response/revision	Owner	Status
Leo Tran	Mock/internal rehearsal peer	Weekly plan must show QA and packaging.	Added sprint evidence, validation tasks, and zip checks.	Le Minh	Done
Ivy Chen	Mock/internal rehearsal peer	Mockups should not imply invented screenshots.	Changed all mockups to written UI descriptions only.	Trang Minh Nhut	Done

Revision log and owner mapping

Revision area	Owner	Evidence of change
Scope, evidence protocol, final QA	Le Minh	Product pair, source protocol, final scan, and packaging locked
FIFA.com findings	Nguyen Vu Bach	FIFA personas, use cases, screenshot evidence, and HCI findings
Chess.com findings	Pham Nguyen Gia Bao	Chess.com personas, use cases, screenshot evidence, and HCI findings
HCI solution priorities	Trang Minh Nhut	Drawback-to-solution matrix and visual solution QA
Sprint evidence and packaging	Le Minh	WeeklyReport, PDF extraction, and zip validation
Figure and caption QA	Trang Minh Nhut	Annotated screenshot and solution figure consistency checks

Rehearsal checklist

- Check 1: First slide names FIFA and Chess.com only.
- Check 2: Method slide explains official-source-first evidence.
- Check 3: Persona slide ties each person to a context and task.
- Check 4: FIFA slide includes benefits and drawbacks with concrete controls.
- Check 5: Chess.com slide includes play, review, analysis, learning, premove, and Focus Mode.
- Check 6: Solution slide states UI behavior, effect, tradeoff, priority, and effort.
- Check 7: Close names regenerated PDFs and top-level zip.
- Check 8: Q&A; uses HCI reasoning instead of generic praise.
