

GroupID-PA1 Peer Review Preparation: FIFA and Chess.com

Seven-minute script

Member1 opens by naming the pair: FIFA and Chess.com web experiences. The first contrast is task posture: FIFA is browse, compare, and follow, while Chess.com is do, review, and improve. Member1 then explains the official-source protocol and why numbered references are used. Member2 introduces six personas and emphasizes context: short campus browsing, office scanning, trust-sensitive ticket planning, beginner learning, blitz play, and deep review. Member3 presents FIFA findings, starting with navigation and official ticket trust, then moving into the drawbacks of ecosystem sprawl, FIFA+ continuity, dense watch rails, ticket status uncertainty, and article-to-utility friction. Member4 presents Chess.com findings, showing how Play, Puzzles, Learn, Game Review, Analysis, and Study Plans support action and reflection, then explaining risks from feature overload, premove execution, hidden Focus Mode controls, and complex analysis screens. Member4 closes the design portion with quick wins and deeper redesigns. Member5 finishes with the two-week RUP plus Scrum plan, peer-review feedback loop, citation QA, PDF text extraction, old-term scan, and zip packaging.

Slide outline

Slide	Topic	Purpose	Speaker	Time
1	Scope and selected pair	FIFA browse-first web ecosystem and Chess.com action-first web platform; Figure F-01 and Figure C-01	Member1	0:45
2	Evidence method and official source protocol	Official pages first; Playwright screenshots and manifest; Figure F-04 and Figure C-02	Member1	0:55
3	Personas and contexts	Six personas with task, device, attention, trust, and learning contexts; Figure F-08 and Figure C-08	Member2	1:00
4	FIFA findings	Navigation, Match Centre, mobile interruption, article density, and handoff drawbacks; Figure F-02, Figure F-04, Figure F-06, Figure F-08	Member3	1:10
5	Chess.com findings	Play, board, puzzles, Learn, navigation, and feedback density; Figure C-02, Figure C-03, Figure C-04, Figure C-05, Figure C-06	Member4	1:10
6	Solution priorities	Quick wins versus deeper redesigns and impact-effort rationale; Figure S-01 to Figure S-08	Member4	1:10
7	Sprint plan, QA, and packaging	Two-week RUP plus Scrum process, visual QA, PDF regeneration, zip validation; Figure F-09 and Figure C-09	Member5	0:50

Likely questions and prepared answers

Question	Prepared answer
Why pair FIFA with Chess.com?	They are both high-traffic web experiences, but FIFA is browse-first while Chess.com is action-first, so the contrast exposes different HCI tradeoffs.
Which site is stronger for fast task completion?	Chess.com is stronger for immediate action because Play is primary and the start-game flow is short. FIFA is fast for official labels but slower when tasks cross properties.
Which site carries more scan load?	FIFA+ and Chess.com analysis both carry scan load; FIFA+ uses dense rails, while Chess.com analysis exposes charts, toggles, lines, and access expectations.
Which site shows better feedback after action?	Chess.com, because Game Review and Analysis provide graph, classifications, retry, and engine feedback after a completed game.
Why is FIFA+ a continuity problem?	The user moves from FIFA information pages to a DAZN-branded watch page with sign-in/get-started controls, creating trust and mode-boundary friction.
Why is premove both a feature and a risk?	It saves time in blitz, but it can legally execute after an unexpected reply and create a blunder.
How did the team avoid generic UX claims?	Every finding names page or flow, control, user, context, principle, scenario, severity, and evidence.
Which redesign gives best impact for effort?	F-S3 and C-S3 are strong low-effort wins: the handoff explainer reduces trust friction and the beginner analysis preset reduces cognitive load.

Mock feedback entries

Reviewer	Role	Feedback	Response/revision	Owner	Status
Nora Lee	Peer	FIFA ticket trust needs a stronger official-source cue.	Added F-HCI3, F-D4, F-S7, and F-S8 with FIFA.com/tickets citations.	Member3	Done
Omar Khan	Peer	Explain why FIFA+ is not just another page.	Added DAZN-branded handoff risk, explainer card, and shared breadcrumb solution.	Member4	Done
Jin Park	Peer	Chess.com beginner analysis sounds too expert-focused.	Added C-S3 beginner preset and C-S4 inline glossary.	Member4	Done
Mira Vo	Peer	Premove needs an error-prevention solution.	Added premove queue preview and fast clear shortcut.	Member4	Done
Sam Patel	Peer	Focus Mode discovery should cite the hover behavior.	Linked C-HCI9 to board-size and Focus Mode support pages.	Member3	Done
Hana Lim	Peer	The pair needs a clearer comparison logic.	Reframed FIFA as browse, compare, follow and Chess.com as do, review, improve.	Member1	Done
Leo Tran	Peer	Weekly plan must show QA and packaging.	Added Day 13 and Day 14 validation tasks and zip checks.	Member5	Done
Ivy Chen	Peer	Mockups should not imply invented screenshots.	Changed all mockups to written UI descriptions only.	Member4	Done

Revision log and owner mapping

Revision area	Owner	Evidence of change
Scope	Member1	Product pair and cross-product framing locked
Personas/use cases	Member2	Six personas and ten detailed use cases
HCI findings	Member3	Twenty findings with scenario and citation
Solutions	Member4	Ten drawbacks and twenty UI-level solutions
QA/package	Member5	PDF extraction, old-term scan, and zip validation

Rehearsal checklist

- Check 1: First slide names FIFA and Chess.com only.
- Check 2: Method slide explains official-source-first evidence.
- Check 3: Persona slide ties each person to a context and task.
- Check 4: FIFA slide includes benefits and drawbacks with concrete controls.
- Check 5: Chess.com slide includes play, review, analysis, learning, premove, and Focus Mode.
- Check 6: Solution slide states UI behavior, effect, tradeoff, priority, and effort.
- Check 7: Close names regenerated PDFs and top-level zip.
- Check 8: Q&A; uses HCI reasoning instead of generic praise.
