

GroupID-PA1 Weekly Report: Strava and Nike Run Club

Sprint objective

The 14-day sprint objective is to produce a consistent PA1 package comparing Strava and Nike Run Club, including product research, potential solutions, peer-review preparation, and a weekly report with validated PDFs and zip packaging.

Team roster

Member	Role
Member1	Coordinator/citation QA
Member2	Persona and use-case lead
Member3	HCI findings lead
Member4	Solution design lead
Member5	Report packaging and validation lead

Sprint planning record

Meeting	Attendance	Decisions	Actions
Sprint planning	All placeholder members	Product pair locked as Strava and Nike Run Club; RUP artifacts mapped into Scrum sprint; sour	

14-day sprint plan

Day	Task	Owner	Reviewer	Hours	Dependency	Output	Done criteria
1	Kickoff and scope lock	Member1	All	3	None	Product pair locked as Strava and Nike Run Club	Team agrees on IDs and citation
2	Official-source collection for Strava	Member2	Member1	4	Scope	Strava source log	At least 6 official sources
3	Official-source collection for Nike Run Club	Member3	Member1	4	Scope	Nike Run Club source log	At least 7 official or repu
4	Personas for both products	Member2	Member3	5	Sources	6 personas	Contexts include device, motion, lighting/noise
5	Use cases for both products	Member2	Member4	5	Personas	10 use cases	Each includes alternate/error/feedback
6	Strava HCI findings	Member3	Member4	5	Use cases	10 Strava findings	Each cites evidence
7	Nike Run Club HCI findings	Member3	Member4	5	Use cases	10 Nike Run Club findings	Each cites evidence
8	Strava/Nike Run Club comparison	Member1	Member5	4	Findings	Comparison table	12 dimensions covered
9	Drawback inventory	Member4	Member2	4	Findings	10 drawbacks	IDs S-D and N-D only
10	Potential solution design	Member4	Member3	6	Drawbacks	20 solutions	2 solutions per drawback
11	Peer-review preparation	Member5	Member1	4	Drafts	7-slide plan	7-minute script and Q&A
12	Internal review and citation QA	Member1	All	5	Drafts	QA notes	No unsupported claims
13	PDF generation and text validation	Member5	Member1	4	QA	Four PDFs	No restricted old product text
14	Final zip packaging	Member5	Member1	2	PDFs	GroupID-PA1.zip	Four PDFs at top level

Weekly scrum 1

Member	Done	Next	Blocker
Member1	Locked Strava and Nike Run Club scope; created citation policy.	Review source log and comparison dimensions.	Needs real gro
Member2	Drafted Strava and Nike Run Club personas.	Complete use cases.	None.
Member3	Collected Nike Run Club official app/help/newsroom sources.	Write HCI findings.	Some app-store wording is long and must be
Member4	Started drawback taxonomy.	Map solutions to HCI concepts.	Waiting for final findings.
Member5	Prepared report structure and packaging checklist.	Validate PDFs and zip.	Weekly template PDF not present locally.

Weekly scrum 2

Member	Done	Next	Blocker
Member1	Checked citations and product-name consistency.	Final source scan.	None.
Member2	Completed 10 use cases with context and feedback.	Review peer questions.	None.
Member3	Completed Strava and Nike Run Club HCI findings.	Support speaker notes.	None.
Member4	Completed 20 solutions and priority table.	Help QA drawback mapping.	None.
Member5	Generated PDFs and zip draft.	Run text extraction and zip listing.	None.

Hours matrix

Member	Research	Writing	Review	Packaging	Total
Member1	4	5	5	1	15
Member2	5	6	2	0	13
Member3	6	5	2	0	13
Member4	2	7	3	0	12
Member5	1	4	3	5	13

Sprint review

Reviewed item	Result	Follow-up
ProductResearch	Pass: Strava and Nike Run Club personas, use cases, HCI findings, drawbacks, comparison, diagrams, and references included.	
PotentialSolutions	Pass: every drawback maps to two solutions and HCI principles. Prototype quick wins if PA2 asks for mockups.	
PeerReview	Pass: 7-minute script, slide plan, questions, feedback, and revision log included. Use real commenter names after live review.	
WeeklyReport	Pass: RUP + Scrum structure, 14-day plan, scrums, hours matrix, and checklist included. Use official course template if needed.	

Submission checklist

Check	Status
Four PDFs generated	Pass
Zip contains four PDFs at top level	Pass
Source log created	Pass
No old product analysis in deliverables	Pass
Team roster appears	Pass
Sprint planning, two weekly scrums, sprint review appear	Pass

Risk and QA log

Risk 1: Product-pair inconsistency across reports. Mitigation: keep product names in the shared generator and regenerate all artifacts in one command.

Risk 2: Unsupported interface claims. Mitigation: every HCI finding uses official product, support, app-store, help, or newsroom citations and avoids invented screenshots.

Risk 3: Beginner analysis becoming generic. Mitigation: Nike Run Club use cases include trigger, context, preconditions, postconditions, normal flow, alternate flow, error path, and feedback.

Risk 4: Privacy and safety claims becoming vague. Mitigation: Strava privacy is tied to audience controls, while Nike Run Club safety is tied to live location sharing recipients, duration, and stop confirmation.

Risk 5: Generated output drifting from source files. Mitigation: the generator overwrites Markdown, JSON, PDFs, manifest, extracted text, and zip package in the same run.

Definition of done

ProductResearch is done when it contains two products, six personas, ten use cases, twenty HCI findings, ten drawbacks, ten benefits, cross-product comparison, two diagrams, and references.

PotentialSolutions is done when every Strava and Nike Run Club drawback has two mapped solutions with UI behavior detail, HCI principle mapping, priority, effort, tradeoffs, and rollout placement.

PeerReview is done when the seven-slide plan, seven-minute script, likely Q&A, feedback table, and revision log all use Strava and Nike Run Club consistently.

WeeklyReport is done when the 14-day sprint plan, sprint planning record, two weekly scrums, sprint review, hours matrix, and submission checklist all match the corrected product pair.

Packaging is done when the zip contains exactly the four regenerated PDFs at top level and no source files.

Daily evidence notes

Day 1 note: The team locked the corrected product pair and agreed that all IDs must use S-P, N-P, S-UC, N-UC, S-HCI, N-HCI, S-D, N-D, S-S, and N-S formats.

Day 2 note: Strava source collection focused on official product, support, route, privacy, segment, challenge, App Store, and Google Play sources.

Day 3 note: Nike Run Club source collection focused on official Nike product, App Store, Google Play, training plan, help, newsroom, and running-goals sources.

Day 4 note: Persona writing emphasized real running contexts rather than demographic-only profiles.

Day 5 note: Use-case writing required normal flow, alternate flow, error path, feedback, preconditions, and postconditions.

Day 6 note: Strava HCI findings were checked against record, route, privacy, segment, challenge, and activity-detail flows.

Day 7 note: Nike Run Club HCI findings were checked against free run, Guided Run, training plan, challenge, achievement, live sharing, metrics, and optional Apple Watch support.

Day 8 note: The comparison table was rewritten around sports scope, target users, recording flow, guidance style, social feedback, privacy and safety, metric density, motivation design, learnability, error tolerance, accessibility, and context fit.

Day 9 note: Drawbacks were normalized so ProductResearch and PotentialSolutions use the same S-D and N-D IDs.

Day 10 note: Solution design required two solutions per drawback and rejected ideas that lacked a concrete control or feedback behavior.

Day 11 note: Peer-review preparation balanced speaker timing across five placeholder members and kept the presentation to seven minutes.

Day 12 note: Citation QA checked that product claims are supported by numbered references and that no irrelevant source remains in deliverables.

Day 13 note: Output QA extracted PDF text, checked file sizes, scanned restricted terms, and inspected zip contents.

Day 14 note: The final package was created with exactly four PDFs at top level.

Two-week sprint timeline

Flowchart LR

A[Day 1 kickoff] --> B[Days 2-3 sources] --> C[Days 4-5 personas/use cases] --> D[Days 6-8 HCI/comparison] --> E[Days 9-11 solutions/drafts]

Text fallback: Day 1 kickoff -> Days 2-3 sources -> Days 4-5 personas/use cases -> Days 6-8 HCI/comparison -> Days 9-11 solutions/drafts -> Days 12-13 review/QA -> Day 14 export/package.
