

Group10-PA3 Peer Review Capture

Requirement 3 · Evidence structure for the 5–10 minute presentation

Field	Value
Group	Group 10
Project	FIFA.com ticket confidence + Chess.com beginner review
Evidence mode	AI-Agent Formative Testing · R1-R5 independent reviewer records
Submission artifact	Group10-PA3-PeerReview.docx / capture PDF
Date prepared	18 August 2026

HARD EXTERNAL BLOCKER

No verified PA3 lecture/class commenter record was located in the repository. This document is a ready-to-fill capture structure, not a claim that peer review has been completed.

Official requirement

During the 5–10 minute presentation, record the lecturer or other group feedback/questions, the commenter name, the feedback or question, and the group response. Keep the evidence tied to the affected requirement or artifact change.

Evidence capture table

Commenter	Role/group where known	Feedback or Question	Group Response	Change Made	Evidence / affected requirement
Not yet captured	Not yet captured	Add actual lecture/class feedback or question here.	Add the group's response here.	Add the resulting change or 'No change; rationale' here.	Add slide/report/prototype reference and R3 requirement link here.

How to complete before submission

- Capture the actual commenter name; do not substitute an AI reviewer ID.
- Record the exact feedback/question in concise paraphrase or a short verified quote.
- Record the group response and the change made, if any.
- Attach or link the lecture/class evidence if the course workflow provides it.
- Do not mark Requirement 3 PASS until a real commenter record and group response exist.

Current status

Requirement 3

BLOCKED EXTERNALLY — local capture structure complete; actual PA3 peer-review evidence is still required.
